Board of Directors' Report 2025

Company structure and business model

Multitude Capital Oyj (hereafter referred to as “Multitude Capital”, or “the Company”) is a wholly owned subsidiary of Multitude AG. The Company was incorporated on 6 June 2024 in Finland. Multitude Capital currently acts as a funding vehicle for the Multitude Group, with its core responsibility being the issuance of bonds to provide liquidity for the Group’s operations.

On 12 June 2024, Multitude Capital successfully launched an EUR 80 million senior unsecured bond with a 4-year maturity. On 17 December 2024, Multitude Capital launched an additional EUR 20 million senior unsecured bond, which was fully subscribed by the Company. As at 31 December 2025, EUR 6.6 million from the additional bond was sold to investors. The remaining bond will be sold at a later stage.

These issuances are part of a larger EUR 150 million bond programme, allowing for additional future issuances. The Bond issuance saw strong demand from both existing and new investors and are carrying a floating rate coupon of 3-month EURIBOR plus 6.75 per cent and have been priced at 97.6 per cent of the nominal amount.

Fitch Ratings Inc. has assigned the Bonds a B+/RR4 rating in January 2026.

Immediately after the issuing, the bonds were listed on the Frankfurt Stock Exchange Open Market under ISIN: NO0013259747. On 23 December 2024 the Bonds have been listed on the Corporate Bond list of the Nasdaq Stockholm Stock Exchange. The secondary listing enhances liquidity and increases the visibility of the bonds, further improving their marketability and attracting a wider range of institutional and retail investors.

Multitude AG serves as the guarantor for the bonds issued by Multitude Capital. This guarantee ensures that bondholders are protected by the financial strength and stability of the Multitude Group.

A portion of the proceeds from the bond issuance was used to redeem the EUR 50 million bond previously issued by Multitude AG in December 2022. Multitude Capital has financed this early bond redemption through a loan granted to its parent company, Multitude AG. As at December 2025, the carrying amount of the loan is EUR 74.6 million (31 December 2024: EUR 73.8 million).

The terms and conditions of the loan to Multitude AG allow Multitude Capital to generate sufficient liquidity and profitability to fulfil its liabilities to the bond holders, as well as finance its day-to-day operations.

Financial highlights

EUR '000	2025	2024
Net interest income	1,102	510
Profit before income tax	898	100
Net cash flows from operating activities	7,365	518
Net cash flows from financing activities	1,150	80

Statement of profit or loss

The statement of profit or loss reflects a positive net interest income of EUR 1,102 thousand, driven by the interest income on the loan to the parent company.

Statement of financial position

The Company's total assets as at 31 December 2025 amounted to EUR 83.8 million (31 December 2024: EUR 74.7 million), consisting mainly of the loan to the parent company.

The loan agreement with Multitude AG is structured with a total loan limit of EUR 150 million. The interest rate applied to the loan is based on the three-month EURIBOR, with an additional coupon rate of 6.75% and margin 3.90%. Interest on loan is paid quarterly. The loan is set to be fully repaid on its maturity date, which is 27 June 2028, in the form of a bullet payment.

The total liabilities as at 31 December 2025 amounted to EUR 82.9 million (31 December 2024 EUR 74.6 million), primarily driven by the debt securities issued.

	Total equity	878	160

Risk factors and risk management

The Company's activities expose it to various financial risks, including credit risk, market risk and liquidity risk. The Company is committed to maintaining a balanced risk-return profile to mitigate any adverse impacts on its financial health and performance.

1. Credit risks

The primary credit risk faced by Multitude Capital arises from the loan extended to its parent company, Multitude AG. To manage this risk, the Company relies on credit assessments conducted by Fitch Ratings, which evaluates the financial stability and creditworthiness of the Group. Multitude Capital has established clear loan terms, including interest rates and repayment schedules, and continuously monitors the loan's performance through regular financial updates and periodic reviews.

Multitude Capital manages its credit risk both separately and as part of overall risk strategy of the Group and hence it considers all major economic events impacting the Group's credit exposure.

2. Market risks, mainly related to interest rate risk

The Company is subject to interest rate risk, which may affect its net interest income and the value of its financial assets and liabilities. This risk stems from both the issued debt securities and the loan to the parent company. To mitigate this risk, the loan to the parent is tied to the same EURIBOR rate as the bonds, ensuring natural hedge. Additionally, the loan carries an interest rate margin that not only covers operating costs but also generates profit for Multitude Capital.

3. Liquidity risk

Managing liquidity is a key priority for the Company, particularly in ensuring it meets its obligations to bondholders. The loan structure with the parent company is designed to ensure sufficient liquidity for interest and principal payments. Moreover, Multitude AG's role as guarantor of the bonds provides an added layer of protection. Should any liquidity challenges arise, the parent company is prepared to assume responsibility for any outstanding obligations.

Multitude Capital Oyj remains well-positioned to meet its obligations and continue its role as a key funding vehicle for the Multitude Group.

Equity shares

The table below shows composition of authorised share capital of Multitude Capital Oyj:

N '000	31 December 2025	31 December 2024
ORDINARY SHARE CAPITAL	80	80

The Articles of Association do not contain any special provisions regarding the equity shares.

Sector Classification of Multitude AG

Multitude AG, the sole shareholder of Multitude Capital Oyj, is classified under S.11102 – Non-Financial Corporations according to Statistics Finland's sector classification.

Potential dividends

The Board of Directors has not proposed any dividend distribution.

Significant events after the reporting period

The Company has assessed events occurring after the reporting period and concluded that there are no events that would require adjustment to or disclosure in this annual report.

Company management and auditor

Bernd Egger serves as sole member of the Board of Directors. The shareholder has appointed PricewaterhouseCoopers Oy as the auditor, with APA Jukka Paunonen as the auditor with principal responsibility.

Notes to the financial statements

1. General information

Multitude Capital Oyj (Multitude Capital or the “Company”) is a company functioning under the laws of Finland with business identity code: 3454519-9. The Company has been established on 6 June 2024 and is headquartered at Ratamestarinkatu 11 A, 00520, Helsinki, Finland. Multitude Capital has listed bonds on the Frankfurt Stock Exchange and on Nasdaq Stockholm under ISIN: NO0013259747.

Multitude Capital is a wholly owned subsidiary of Multitude AG (formerly Multitude p.l.c/Multitude SE) and functions as a dedicated funding vehicle for the Multitude Group (the “Group”).

Multitude AG (business identity code C 109441) is the ultimate parent of the Multitude Group. Multitude AG was established in 2005. Until 30 June 2024, Multitude AG was headquartered at Ratamestarinkatu 11 A, 00520, Helsinki, Finland.

From 30 June to 30 December 2024, its headquarters were located at ST Business Centre 120, The Strand, Gzira, GZR 1027, Malta. On 30 December 2024, the parent company redomiciled to the canton of Zug, at Grafenauweg 8, 6300, Zug, Switzerland, where it is currently domiciled. Copies of the consolidated financial statements of the Multitude Group are available at <https://www.multitude.com/investors/results-reports-and-publications>.

2. Basis of preparation and accounting policies

2.1 Basis of preparation

2.1.1 Statement of compliance

The financial statements of the Company are prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and adopted by the European Union. IFRS Accounting Standards comprise the following authoritative literature: IFRS Accounting Standards, IAS® Standards, Interpretations developed by the IFRS Interpretations Committee (IFRIC® Interpretations) or its predecessor body, the Standing Interpretations Committee (SIC® Interpretations).

The Company has prepared its financial statements on the assumption that it will continue to operate as a going concern.

2.1.2 Historical cost preparation

The financial statements have been prepared on a historical cost basis, except for financial instruments measured at amortised cost in accordance with IFRS 9.

2.1.3 Functional and presentation currency

The items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates (the “functional currency”). The functional currency of Multitude Capital Oyj is Euro.

The financial statements are presented in thousands of Euros (“EUR 000”).

2.2 Presentation of the financial statements

The Company presents its statement of financial position in order of liquidity based on its intention and perceived ability to recover/settle the majority of assets/liabilities of the corresponding financial statement line item. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 13.

2.3 New standards and amendments

The Company has applied all standards, interpretations and amendments that are effective at the date of the preparation of these financial statements.

a) The following requirements have become effective during the financial period:

Title	Key requirements	Effective Date
Amendments to IAS 21 - Lack of Exchangeability	This requirement is not relevant as the Company does not operate with foreign currencies that lack exchangeability.	1 January 2025

b) IFRS Interpretations Committee agenda decisions issued during the financial period, but not relevant for the preparation of these financial statements:

Key requirements	Effective Date
Classification of Cash flows related to variation margin calls on ‘Collateralised-to-Market’ Contracts (IAS 7).	3 February 2025
Guarantees Issued on Obligations of Other Entities (IFRS 9; IFRS 15; IFRS 17 ;IAS 37)	11 April 2025
Recognition of Revenue from Tuition Fees (IFRS 15)	11 April 2025
Recognition of Intangible Assets from Climate-related Expenditure (IAS 38)	11 April 2025
Assessing Indicators of Hyperinflationary Economies (IAS 29)	28 July 2025

(c) Forthcoming requirements

The following standards and amendments had been issued but were not mandatory for annual reporting periods ending on 31 December 2025.

Title	Key requirements	Effective Date
Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments	1. Derecognition of Financial Liabilities (IFRS 9) Electronic Transfers: allows entities to derecognise a financial liability settled through electronic payment systems before the settlement date, if certain criteria are met. The option must be applied consistently to all such transactions. 2. Classification of Financial Assets (IFRS 9) Basic Lending Arrangement: provides guidance on assessing whether contractual cash flows align with a basic lending arrangement, with added examples for clarity. Non-Recourse Features: clarifies that a financial asset has non-recourse features if cash flows are limited to those generated by specific assets. Contractually Linked Instruments: clarifies whether that the key element that distinguishes CLIs from other financial assets with non-recourse features is the waterfall payment structure that results in a disproportionate allocation of cash shortfalls between the tranches. 3. Disclosure Requirements (IFRS 7) Equity Investments at Fair Value: changes some of the disclosure requirements of such instruments. Contingent Contractual Terms: mandates the disclosure of contractual terms that could alter cash flows based on contingent events, covering financial assets and liabilities at amortised cost or fair value. None of the above amendments are expected to have a significant impact on the Company's financial statements.	1 January 2026
IFRS 18 Presentation and Disclosure in Financial Statements	IFRS 18 introduces mandatory subtotals, such as "operating profit," to improve clarity in financial performance reporting. It requires classification of income and expenses into specific categories like operating, investing, and financing. Management-defined performance measures (MPMs) must be clearly labelled, reconciled with IFRS measures, and explained for their usefulness. Comparative information for all reported amounts must be provided, with explanations for any changes. The standard emphasises proper aggregation and disaggregation to ensure meaningful and clear financial statements. Finally, IFRS 18 will replace IAS 1 while retaining its key principles. Apart from a change in presentation and disclosures, this standard is not expected to have a significant impact in the financial position, profit and loss or cash flows of the Company.	1 January 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures	This standard is not relevant, as, after the listing of the bonds on Nasdaq Stockholm, the Company has gained public accountability.	1 January 2027

2.4 Summary of material accounting policies

2.4.1 Recognition of interest income/expense and effective interest rate

The Company recognises interest income and interest expense by applying the effective interest method (EIR). The EIR is the rate that exactly discounts projected future cash flows through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the EIR for financial instruments, the Company estimates future cash flows considering all the contractual terms of the financial instrument, excluding expected credit losses.

The EIR, and consequently the amortised cost of the financial asset, is determined by considering transaction costs, any discount or premium on the acquisition of the financial asset, as well as fees and costs integral to the EIR. The EIR calculation also accommodates the potential impact of other characteristics of the product life cycle including early repayments, extension, call, and similar options, as well as penalty charges.

If revisions to the expected cash flows of fixed rate financial assets or liabilities occur for reasons other than credit risk, the changes to future contractual cash flows are discounted at the original EIR, resulting in an adjustment to the carrying amount. The difference with the previous carrying amount is recorded as a positive or negative adjustment to the financial asset or liability's carrying amount in the statement of financial position, with a corresponding increase or decrease in interest income/expense calculated using the effective interest method.

In the case of floating rate financial instruments, periodic re-estimation of cash flows to reflect market interest rate movements also impacts the effective interest rate. However, when instruments were initially recognised at an amount equal to the principal, re-estimating future interest payments does not significantly affect the carrying amount of the asset or liability.

2.4.2 Income tax expense

2.4.2.1 Recognition of income taxes

The income taxes comprise current tax and deferred tax. Income tax gain or expense is recognised in the statement of profit or loss, except to the extent that it relates to items recognised in other comprehensive income, or directly in equity.

2.4.2.2 Current taxes

Current taxes are based on the results of Company and are calculated using local tax regulations and tax rates enacted or substantively enacted at each reporting date. The only source of the income is in and regulated by the Finnish tax regime.

2.4.2.3 Deferred taxes

Deferred tax assets and liabilities are determined using the balance sheet method for all temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Recognition of deferred tax assets is contingent upon the availability of future taxable profit against which unused tax losses, tax credits, and deductible temporary differences can be utilised.

The realisability of deferred tax assets is assessed at each reporting date, and adjustments are made if circumstances indicate that these assets are no longer probable to be utilised.

The enacted or substantively enacted tax rates as of each reporting date, expected to apply when the asset is realised or the liability is settled, are employed in measuring deferred tax assets and liabilities.

Deferred tax assets and liabilities are not subject to discounting. The Company regularly assesses positions taken in tax returns concerning situations where applicable tax regulations are subject to interpretation. Adjustments to the recorded amounts of current and deferred tax assets and liabilities are made when it is considered probable, i.e., more likely than not, that certain tax positions may not be fully sustained upon review by tax authorities. The recorded amounts are based on the most likely amount or the expected value, depending on the method that the Company expects to predict the uncertainty's resolution better.

Deferred tax related to assets and liabilities arising from a single transaction that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences, will require the recognition of deferred tax assets and liabilities in equal amounts. Deferred tax assets and deferred tax liabilities are offset for presentation purposes if, and only if:

- a) a legally enforceable right exists to offset current tax assets against current tax liabilities;
- b) the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously in each future period where significant amounts of deferred tax liabilities or deferred tax assets are expected to be settled or recovered.

2.4.3 Cash and cash equivalents

Cash and cash equivalents include cash at banks and on hand.

2.4.4 Financial assets

2.4.4.1 Initial recognition and measurement of financial assets

The Company recognises a financial asset in its statement of financial position when it becomes a party to the contractual provisions of the instrument.

At initial recognition, the Company measures a financial asset at fair value plus transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset, such as fees and commissions.

When the fair value of financial assets differs from the transaction price on initial recognition, the Company recognises the difference as follows:

- when the fair value is evidenced by a quoted price in an active market for an identical asset (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.
- in all other cases, the difference is deferred, and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

2.4.4.2 Classification and subsequent measurement of financial assets

The Company has classified the loan to the parent company as a financial asset measured at amortised cost.

After the initial recognition, the carrying amount is reduced for principal payments, plus or minus the cumulative amortisation using the effective interest method. After initial measurement, the Company determines loss allowances related to financial assets, using the expected credit loss ("ECL") model. The Company's ECL model, inputs, and assumptions are disclosed in Note 4.

2.4.4.3 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of the consideration received (including any new asset obtained less any new liability assumed) is recognised in the statement of profit or loss.

If an existing financial asset is replaced by another asset from the same counterparty under substantially different terms, or if the terms of the financial asset are substantially modified (due to forbearance measures or otherwise), the existing financial asset is derecognised and a new asset is recognised. Any difference between the respective carrying amounts is recognised in the statement of profit or loss.

2.4.5 Financial liabilities

2.4.5.1 Initial recognition and measurement of financial liabilities

The Company recognises a financial liability on its statement of financial position when it becomes a party to the contractual provisions of the instrument. The Company generally recognises financial liabilities on initial measurement at their fair value including transaction costs and subsequently measures them at amortised cost using the effective interest method (EIR), with resulting interest expense recognised as an interest expense in the statement of profit or loss.

At initial recognition, the Company has assessed the classification of the Bond and has concluded that it should be classified as debt instrument.

2.4.5.2 Classification and subsequent measurement of financial liabilities

The Company classifies all its financial liabilities as being subsequently measured at amortised cost. Financial liabilities include debt securities.

2.4.5.3 Derecognition of financial liabilities

The Company derecognises a financial liability, or portion of a financial liability, when its contractual obligations that comprise the financial liability are discharged, cancelled or expired.

An exchange between the Company and the lender of debt instruments with substantially different terms is the extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial

liability, or a part of an existing financial liability, is accounted for as an extinguishment of the original financial liability and the recognition of a new one. The terms of a financial liability are considered substantially different if the discounted present value of the cash flows under the new terms is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability.

The Company recognises the difference between the carrying amount of a financial liability or part of a financial liability, extinguished or transferred to another party and the consideration paid, including any noncash assets transferred, or liabilities assumed, as gain or loss in the statement of profit or loss.

When the Company repurchases a part of a financial liability, it allocates the previous carrying amount of the financial liability between the part that continues to be recognised and the part that is derecognised based on the relative fair values of those parts on the date of the repurchase. Similarly, the Company recognises the difference between the carrying amount allocated to the part derecognised and the consideration paid, including any non-cash assets transferred, or liabilities assumed, for the part derecognised in the statement of profit or loss.

2.4.6 Equity

Ordinary shares are classified as equity. Share capital is recognised when the Company issues the shares. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

2.4.7 Offsetting financial instruments

Financial assets and financial liabilities are generally reported gross in the statement of financial position, except when certain criteria are met. Financial assets and financial liabilities are offset, and the net amount is reported in the statement of financial position, when and only when, the company:

- a) has a present legally enforceable right to set off the recognised amounts; and
- b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2.4.8 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest, by using quoted market rates, discounted cash flow analyses and other appropriate valuation models. The Company uses valuation techniques that are appropriate, depending on circumstances and for which sufficient data is available to measure fair value, while maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All financial instruments for which fair values are being measured or disclosed in the financial statements are categorised within the nature, characteristics and risks of the asset or liability, and the level of the fair value hierarchy, based on the lowest-level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices for exchange-traded products in active markets for identical assets or liabilities;
- Level 2 - Valuation techniques for which significant inputs other than quoted prices are directly or indirectly observable; and
- Level 3 - Valuation techniques for which significant inputs are unobservable.

Although none of the financial assets and liabilities have been classified as subsequently measured at fair value, the Company measures the financial assets and liabilities at fair value at their initial recognition. The Company also discloses the fair value of financial assets and liabilities as required by IFRS 7 (Notes 9 and 12).

2.4.9 Events after the reporting period

The Company monitors subsequent events or transactions occurring after the end of the reporting period and before the financial statements are authorised for issue. For each event, the Company assesses:

- Whether it provides evidence of conditions that existed at the end of the reporting period (adjusting event);
- Whether it indicates conditions that arose after the reporting period (non-adjusting event).

Based on this assessment, the Company either adjusts the financial statements for significant adjusting events or provides appropriate disclosure for significant non-adjusting events.

Any significant subsequent events occurring after 31 December 2025 and before 25 March 2026, when the Company's Board of Directors authorises the financial statements, are reported in the financial statements (Note 16).

3. Significant accounting judgements, estimates and assumptions

The preparation of financial statements requires the use of management judgement in electing and applying accounting policies, as well as making estimates and assumptions about the future. These judgements, estimates and assumptions may significantly affect the amounts recognised in the financial statements.

The estimates and assumptions used in determining the carrying amounts of assets and liabilities are based on historical experience, expected outcomes and various other factors that were available when these financial statements were prepared, and they are believed to be reasonable under the circumstances. The estimates and assumptions are reviewed continually and revised if circumstances change or due to new information or more experience. As estimates and assumptions inherently contain varying uncertainty, actual outcomes may differ resulting in adjustments to the carrying amounts of assets and liabilities in the subsequent periods.

Management considers that the only significant accounting estimate is related to the ECL model, input and assumptions.

The measurement of the expected credit loss allowance for financial assets measured at amortised cost is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour. An explanation of the inputs, assumptions and estimation techniques used in measuring ECL is given in the Note 4.2 below.

4. Financial risk management

4.1 Financial risk factors

The Company's activities expose it to various financial risks, including credit risk, market risk and liquidity risk. The Company's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on its financial performance.

The Company follows the Multitude Group risk policies. The credit, market and liquidity risks are analysed and considered both separately and jointly with those of Multitude AG as parent company and Multitude Group as a whole.

The Company's risk management policies are designed to identify and analyse risks, set appropriate risk limits and controls, and monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Board of Directors is responsible for the overall effectiveness of the Risk Management function, which duties are however carried out by the members of the Group's Leadership Team and other qualified personnel chosen by the Leadership Team.

The Board of Directors of the Group may delegate any of its powers to a committee. It establishes committees to focus on specific risk areas and issues and consider certain issues and functions in greater detail. These committees may only act in accordance with the powers and responsibilities delegated to them by the Board. In this regard, the extent to which the committee is empowered to make decisions is carefully defined. The members of a committee must be sufficiently qualified to perform the responsibilities of such committee.

The Multitude Group governance structure comprises three Board Committees, namely the Audit Committee, the Risk Committee, and the People and Culture Committee.

The Board of Directors of the Group has delegated to the Risk Committee its oversight responsibilities of the Risk Management function. The main duties of the Risk Committee include:

- to oversee the policy and framework for all risks to which the Group and the Company may be exposed;
- to develop and monitor a risk management system across all business units, including a risk appetite framework, and to ensure the effective implementation of all risk policies;
- to ensure that all risk controls operating are in accordance with regulatory requirements and best practice, and for advising on the coordination and prioritisation of risk management issues.

The task of the People and Culture Committee is to ensure the proper functioning of corporate governance, in particular to ensure the efficient preparation of matters pertaining to the remuneration of the members of the Board, the CEO and other executives as well as the remuneration schemes of the personnel.

The Risk Management function has the overall responsibility for the development of the risk strategy and the implementation of risk principles, framework, policies and related limits.

A Three Lines of Defence risk management and internal control structure has been established to ensure that strategic objectives are met while meeting regulatory and legal requirements and fulfilling the responsibilities to shareholders, clients and staff.

4.2 Credit risk

4.2.1 Introduction

The Company is exposed to credit risk stemming from the loan issued to its parent company.

4.2.2 Credit risk management

Multitude Capital manages its credit risk both separately and as part of overall risk strategy of the Group and hence it takes into account all major economic events impacting the Group's credit exposure.

Loan to parent company

To manage the credit risk of a loan to the parent company, Multitude Capital employs credit assessment made by Fitch rating which is evaluating financial health, credit rating, and historical performance of the Group. Multitude Capital has set clear terms and conditions, including interest rates and repayment schedules of intercompany loan, and implements continuous monitoring through regular financial reporting and periodic reviews.

Cash and cash equivalents

The Company's cash is held with other corporate banks.

4.2.3 Credit risk measurement

Loan to parent company

Multitude Capital's credit risk arises solely from its unsecured loan to the parent company. At inception, the loan's credit quality was thoroughly assessed, and continuous monitoring was performed, with a focus on the parent company's financial health and covenant compliance. In addition to internal evaluations, Multitude Capital relies on external agencies for independent risk ratings to supplement its assessment. Regular reviews of potential expected credit losses (ECL) are conducted based on both internal financial data and external ratings.

Cash and cash equivalents

Cash and cash equivalents include balances with other corporate banks. Multitude Capital uses the external risk grades to reflect its assessment of the probability of default (PD) of such individual counterparties. These published grades are continuously monitored and updated. The PDs associated with each grade are determined based on realised default rates over the prior 12 months, as published by rating agencies. In determining the probability of default of individual counterparties, the Company distinguishes between exposures considered 'investment-grade' defined by recognised external rating agencies as a rating between AAA-BBB- (Standard & Poor's, Fitch) and Aaa-Baa3 (Moody's), and 'non-investment grade' exposures.

4.2.4 Expected credit loss measurement

IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

1. A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and undergoes continuous credit risk monitoring.
2. If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit impaired.
3. If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.

Financial instruments in 'Stage 1' have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in 'Stages 2 or 3' have their ECL measured based on expected credit losses on a lifetime basis.

4.2.4.1 Significant increase in credit risk

To determine whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort, including both quantitative and qualitative information. Such analysis is based on the Company's historical experience and credit assessment made by Fitch.

Loan to parent company

In relation to the loan to parent company, a significant increase in credit risk is deemed to arise, if Multitude AG's credit rating experiences specific downgrades from the initial rating determined at inception of the loan. The Risk Management function evaluates and assesses risk development based on the latest rating made by Fitch. No significant increase in credit risk has occurred with regards to the parent company.

Cash and cash equivalents

In relation to cash and cash equivalents, the Company applies low credit risk simplification and does not measure SICR unless there is a significant decrease in independent credit ratings given to its corporate banking partner. No such decrease in credit ratings of the corporate banking partner has been identified.

4.2.4.2 Measuring ECL - Explanation of inputs, assumptions and estimation techniques

The Company calculates expected credit losses (ECL) as a function of the estimated exposure of default (EAD), probability of default (PD), loss given default (LGD), and discounting using the effective interest rate (EIR). The ECL is measured on either a 12-month or on a lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired.

The Company uses external risk grades to reflect its assessment of the probability of default its parent company. These published grades are continuously monitored and updated.

Loan to parent company

In order for its ECL methodology to represent an appropriate estimation of its credit risk emanating from combined exposure of the Group, the Company assesses the ECL on the average statistical data selected by Fitch for the lending industry in which Multitude Group is categorised.

The loan to the parent company is subject to bullet repayments upon maturity with only interest payments being paid separately throughout the useful life of the loan. Thus, assuming no interest payments are in arrears, the EAD equates to the loan amount itself. The LGD is derived based on the maximum recoverability rating assumed by Fitch.

IFRS 9 provides a practical expedient for recognising 12-month ECL for financial instruments with low credit risk at the reporting date. The Company applies this practical expedient in determining loss allowance for its loan to the parent company, as it considers Multitude Group to be low credit risk. A financial asset is considered as being low credit risk, if it has been issued to a counterparty that is considered "investment grade" based on the definition of external rating agencies - between AAA to BBB- (Standard & Poor's, Fitch) or Aaa-Baa3 (Moody's). On 16th January 2026,

Fitch Ratings confirmed Multitude AG's stable outlook, while affirming its Long-Term Issuer Default Ratings (IDRs) at 'B+'. As at 31 December 2025, the Company made the following assumptions about ECL for the loan to Multitude AG:

Parameter	31 December 2025
PD	0.73%
LGD	50%
ECL	0.365%

The PD rate in the table above is assumed to be the average PD rate calculated as the average cumulative default rate for 1 year reported by Fitch for credit rating of Multitude AG. Since Multitude AG is rated with B+ we assume average PD rate of 0.73% calculated as $(0.94\% + 0.52\%) / 2$ (where BB rating is 0.52% and B rating is 0.94%). LGD is calculated as the maximum recovery rating assumed by Fitch for the credit rating of Multitude AG which is RR4. LGD for RR4 is 50%-69%. The lower bound is assumed because of the positive outlook of B+ rating. ECL rate is multiplication of LGD and PD rates.

Sensitivity analysis

To assess the potential impact of changes in credit risk parameters on the Expected Credit Loss (ECL) of the loan to the parent company, the Company conducted a sensitivity analysis based on adjustments to the Probability of Default (PD) and Loss Given Default (LGD). The table below illustrates how the ECL would vary under optimistic and pessimistic scenarios:

Scenario	Expected credit loss (%)	Effect in the statement of profit and loss (EUR '000)
Base	0.365%	271
Optimistic (PD: 0.52, LGD: 50%)	0.260%	194
Pessimistic (PD: 0.94, LGD 69%)	0.649%	484

Cash and cash equivalents

Credit risk exposure from cash and cash equivalents arises mainly from potential liquidity issues, coupled with liability caps applicable in various jurisdictions of banks which hold the Company's cash and cash equivalents.

The table below shows the amount of cash and cash equivalents deposited in bank accounts, grouped based on Fitch's credit ratings as at 31 December 2025:

EUR '000	31 December 2025
A+	8,749
Unranked by Fitch	364
Total	9,113

As of 31 December 2025, none of the cash and cash equivalents were past due or impaired.

4.3 Market risk

The Company is exposed to interest rate risk, which could impact on its net interest income and the value of assets and liabilities. The items exposing the Company to interest rate risk are the debt securities and the loan to the parent company. To minimise the market risk, the loan to the parent company is based on the same EURIBOR rate as its debt securities. The interest rate for the loan to the parent company also contains a markup that allows it to cover its running costs and produce a profit.

4.4 Liquidity risk

Liquidity risk is the risk that the Company may not have sufficient liquid financial resources to meet its financial liabilities when they fall due. It arises from potential mismatches in the timing of cash flows, both under normal and stress conditions.

The objective of liquidity risk management is to ensure that sufficient liquidity is always available to meet obligations and prevent financial distress. A primary focus of the Company's liquidity risk management is to fulfil its obligations to bondholders.

To address liquidity risk and ensure obligations to bondholders are met, the Company has implemented the following measures:

1. The loan agreement with the parent company is structured to provide Multitude Capital with sufficient liquidity for interest and principal payments to bondholders.
2. Multitude AG acts as the guarantor of the bonds. If Multitude Capital experiences liquidity short-ages, the parent company can assume responsibility for the outstanding payments.

The tables below present an analysis of the Company's financial assets and liabilities, categorised by their expected recovery or settlement periods.

Maturity analysis of undiscounted financial assets as of 31 December 2025:

EUR '000	On demand	Within three months	Between three months and one year	Between 1-2 years	Between 2-5 years	Over 5 years	Total	Carrying amount
Cash and cash equivalents	9,113	-	-	-	-	-	9,113	9,113
Loans to parent company								
Principal	-	-	-	-	74,628	-	74,628	74,628

Total assets	9,113	2,498	6,939	9,210	79,119	-	106,879	83,968

Maturity analysis of undiscounted financial liabilities as of 31 December 2025:

EUR '000	On demand	Within three months	Between three months and one year	Between 1-2 years	Between 2-5 years	Over 5 years	Total	Carrying amount
Debt securities:								
Principal	-	-	-	-	81,189	-	81,189	81,189
Interests		1,894	5,600	7,432	3,625		18,551	61
Loan from third party								
Principal	-	-	-	-	1,150	-	1,150	1,150
Interests		26	79	105	114	-	324	-
Total	-	1,920	5,679	7,538	86,078	-	101,214	82,401

4.5 Capital management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, maintain optimal capital structure to reduce the cost of capital, and ensure it meets the requirements of the bondholders.

The bond issued by Multitude Capital Oyj is guaranteed by Multitude AG, meaning the parent company guarantees the punctual payment of principal and interest under the terms and conditions of the bond. This guarantee helps assure bondholders of the credit-worthiness of the Multitude Group.

As the guarantor of the Bond, Multitude AG is required to ensure that its Net Equity Ratio is maintained at a minimum of 18% at all times. This covenant helps ensure the financial strength and ca-

capacity of the guarantor to support Multitude Capital Oyj in fulfilling its obligations. As of December 2025, the consolidated Net equity Ratio amounted to 21.9%.

Additionally, Multitude AG must meet a Distribution Test, where the Net Equity Ratio must exceed 25% in order to make any restricted distributions. This ensures that Multitude AG retains sufficient equity before making any distributions to shareholders. Multitude AG has met the Distribution Test during the year 2025 and as at the date of these financial statements.

These capital requirements are designed to ensure that Multitude AG maintains a robust financial position, providing security to the bondholders in terms of repayment and interest obligations. Compliance with these covenants is monitored and regularly tested in line with the terms set out in the bond agreement.

Multitude Capital Oyj has no direct maintenance covenants in terms of a Net Equity Ratio. However, its ability to raise additional bonds or distribute funds is contingent upon the financial performance and capital adequacy of its parent, Multitude AG.

5. Segment information

The Company's business activities comprise a single operating segment, which is providing funding to the parent company and the Multitude Group through the issuance of bonds and lending the proceeds to the parent company. The Company has determined, in accordance with IFRS 8, that it operates in one reportable segment and, therefore, no further segmental analysis is required. This conclusion is based on the fact that the Company:

1. Engages in one line of business activity - funding the parent company and the Group by issuing bonds and lending funds.
2. Operates under one main income stream, derived from interest income on loan provided to the parent company.
3. Has a consistent geographical presence, operating solely from its registered office, and no distinct geographical or business segments exist.

Basis for segmentation

In identifying the reportable segment, management considered the internal financial information used for decision-making purposes by the Company's chief operating decision maker (CODM), who monitors the Company's financial performance, reviews its activities, and assesses the financial position on a company-wide basis. The CODM is the Company's Board of Directors.

The Company's performance is assessed based on financial information related solely to its funding activities, including the issuance of bonds and loan to its parent company. Given that the Company does not operate multiple businesses, divisions, or geographical areas, a single segment has been identified.

Financial information of the reportable segment

Segment profit or loss

This table below shows the income earned by the Company from its lending activities, in this case, the loan to the parent company the financial performance of the segment.

EUR '000	1 January – 31 December 2025	6 June – 31 December 2024
Interest income from loan to parent company	9,395	4,968
Interest expense on debt securities	(8,293)	(4,458)
Other expenses	(204)	(410)
Segment profit before tax	898	100

Segment assets and liabilities

This table shows the assets and liabilities assigned to the segment:

EUR '000	As at 31 December 2025	As at 31 December 2024
Total segment assets	83,753	74,711
Total segment liabilities	82,875	74,551

Geographical Information

The company operates in Europe, where all operations, assets and interest income are concentrated.

EUR '000	Interest income for the period 1 January – 31 December 2025	Interest income for the period 6 June – 31 December 2024
Finland	9,395	4,968

Major Customers

Multitude AG is the only customer of the Company:

EUR '000	Interest income for the period 1 January – 31 December 2025	Interest income for the period 6 June – 31 December 2024
Multitude AG	9,395	4,968

6. Interest income and expense

EUR '000	1 January – 31 December 2025	6 June – 31 December 2024
Interest income on loan to parent company	9,395	4,968
Interest expense according to effective interest rate method	(8,053)	(4,336)
Other borrowing costs – guarantee fees	(240)	(120)
Total interest expense and other borrowing costs	(8,293)	(4,458)
Net interest income	1,102	510

7. General and administrative expense

The table below provides a breakdown of the general and administrative expense.

EUR '000	1 January – 31 December 2025	6 June – 31 December 2024
Audit fees	118	94
Professional fees	45	24
Other administrative expenses	39	21
Total	202	139

8. Income tax expense

Income tax expense/gain

EUR '000	1 January – 31 December 2025	6 June – 31 December 2024
CURRENT TAX:		
Current tax expense for the period	(181)	(74)
Total current tax	(181)	(74)
DEFERRED TAX:		
Non-deductible expenses	1	54
Carry forward tax losses	-	-
Total deferred tax	1	54
Total income tax	(180)	(20)

The table below provides a reconciliation of the nominal income tax rate to the effective income tax rate for the period. Since there are no adjustments between the nominal and effective tax rates, the effective rate matches the nominal rate of 20%.

EUR '000	1 January – 31 December 2025	6 June – 31 December 2024
Profit before tax for the period	898	100
Income tax at the nominal tax rate applicable (20%)	(180)	(20)
Tax adjustments	-	-
Income tax expense at the effective tax rate (20%)	(180)	(20)

Deferred tax assets

Changes in and balances of deferred tax assets and liabilities for the period ended on 31 December 2025:

EUR '000	As at 1 January 2025	Recognised in profit or loss	As at 31 December 2025
DEFERRED TAX ASSETS:			
Temporary differences	54	1	55
Total deferred tax assets	54	1	55

Changes in and balances of deferred tax assets and liabilities for the period ended on 31 December 2024:

EUR '000	As at 6 June 2024	Recognised in profit or loss	As of 31 December 2024
DEFERRED TAX ASSETS:			
Temporary differences	-	54	54
Total deferred tax assets	-	54	54

9. Financial assets

The financial assets of the Company are represented by the loan to parent and cash and cash equivalents:

EUR '000	31 December 2025			31 December 2024		
	Gross amount	Expected credit loss	Net amount	Gross amount	Expected credit loss	Net amount
ASSETS						
Cash and cash equivalents	9,113	-	9,113	598	-	598
Loan to parent company	74,854	(273)	74,581	74,320	(271)	74,049
Total financial assets	83,967	(273)	83,694	74,918	(271)	74,647

Expected credit loss reconciliation

The table below presents the movement in the allowance for expected credit losses for the period:

EUR '000	31 December 2025		31 December 2024	
	Stage 1	Total	Stage 1	Total
Opening balance	271	271	-	-
Loan issued to parent company	2	2	271	271
Closing balance	273	273	271	271

Fair value disclosures

The table below summarises the Company's financial assets subsequently measured at amortised cost together with their fair value:

EUR '000	Fair value hierarchy	31 December 2025		31 December 2024	
		Carrying amount	Fair value	Carrying amount	Fair value
FINANCIAL ASSETS AT AMORTISED COST					
Cash and cash equivalents	Level 1	9,113	9,113	598	598
Loan to parent company	Level 3	74,581	74,978	74,049	73,928
Total		83,694	84,091	74,647	74,526

The fair value of the loan to the parent company was determined using a discounted cash flow approach. The future contractual cash flows, consisting of both interest and principal payments, were discounted to their present value using a discount rate comprising the contractual coupon rate and the updated EURIBOR rate as at the reporting date.

10. Accounts and other payables

This table provides a breakdown of the accounts and other payables:

EUR '000	31 December 2025	31 December 2024
Accounts payable	363	466
VAT payable	6	76
Current income tax provision	105	74
Total accounts and other payables	474	616

11. Debt securities

Multitude Capital Oyj issued Senior Guaranteed Unsecured Callable Floating Rate Bonds on 27 June 2024, with a total nominal value of up to EUR 150 million, under ISIN: NO0013259747.

Key terms

The initial issue size amounted to EUR 80 million, with each bond being issued at 97.60% of its nominal value. The bonds mature on 27 June 2028 and will be repaid in full on that date. In December 2024, an additional tranche of EUR 20 million was issued, and fully subscribed by the Company. As at 31 December 2025, EUR 6.6 million from the additional bond was sold to investors

The bonds carry an interest rate based on 3-month EURIBOR, plus a coupon of 6.75% per annum, with interest payments scheduled quarterly, on 27 March, 27 June, 27 September, and 27 December, starting with the first payment due on 27 September 2024.

Call and put options

The bondholders have both call and put options. Multitude Capital has the option to redeem the bonds early at various premium rates depending on the timing. If redeemed within the first 24 months from the issue date, the bonds will be callable at 103.375% of the nominal value, with a gradual reduction in the premium thereafter, reaching 100.85% if called after 42 months. In the event of a change of control, bondholders may demand repurchase at 101% of the nominal value.

Listing

These bonds have been listed on the Frankfurt Stock Exchange Open Market and on the Nasdaq Stockholm.

Guarantee

Multitude AG provides an unconditional and irrevocable guarantee for the bonds, covering the full repayment of principal and interest, as well as ensuring that the Group maintains a Net Equity Ratio of at least 18%. More information on the guarantee is provided in Note 15.

Use of proceeds

The net proceeds from the bond issuance will be used primarily for refinancing existing bonds, covering transaction costs, and supporting general corporate purposes of the Group.

Events of default

The bonds also include standard events of default, such as non-payment, insolvency, or covenant breaches. Should any of these events occur, bondholders have the right to accelerate the repayment of the bonds.

Fair value disclosures

The table below summarises the fair value of the debt securities which are financial liabilities classified as measured subsequently at amortised costs:

EUR '000	Fair value hierarchy	31 December 2025		31 December 2024	
		Carrying amount	Fair value	Carrying amount	Fair value
FINANCIAL LIABILITIES AT AMORTISED COST					
Debt securities	Level 1	81,251	83,569	73,935	76,764
Total		81.251	83.569	73.935	76.764

The fair value of debt securities that includes only listed bonds is determined using level 1 fair value measurement based on the published quotes in the Frankfurt Stock Exchange Open Market.

12. Loan from third parties

The Company entered into an unsecured EUR 1.15 million loan agreement on 29 December, which was fully drawn on the same date. The loan bears interest at EURIBOR (minimum 1.5%) plus a margin of 7.0% per annum, payable quarterly, and is repayable in full three years and one month from inception, with a one-time twelve-month extension option subject to lender approval.

The table below summarises the fair value of the loan from third parties which is a financial liabilities classified as measured subsequently at amortised costs:

EUR '000	Fair value hierarchy	31 December 2025		31 December 2024	
		Carrying amount	Fair value	Carrying amount	Fair value
FINANCIAL LIABILITIES AT AMORTISED COST					
Loan from third parties	Level 1	1,150	1,150	-	-
Total		1,150	1,150	-	-

13. Current and non-current assets and liabilities

Asset and liability line items by amounts recovered or settled within or after one year:

EUR '000	31 December 2025			31 December 2024		
	Within one year	After one year	Total	Within one year	After one year	Total
ASSETS:						
Cash and cash equivalents	9,113	-	9,113	598	-	598
Loan to parent company	227	74,354	74,581	502	73,547	74,049
Prepaid expenses and other assets	4		4	10	-	10
Deferred tax asset	-	55	55	-	54	54
Total	9,344	74,409	83,753	1,110	73,601	74,711
LIABILITIES:						
Accounts and other payables	474	0	474	616	-	616

Loan from third parties	-	1,150	1,150	-	-	-
Total	535	82,340	82,875	1,118	73,803	74,551

14. Equity

The table below shows composition of authorised share capital of Multitude Capital Oyj:

EUR '000	31 December 2025	31 December 2024
Authorised share capital	80	80

The table below shows the composition of issued capital of Multitude Capital Oyj:

N '000	31 December 2025
ORDINARY SHARES ISSUED AND OUTSTANDING	
As of 01 January 2025	80
Shares issued during the period	-
As of 31 December 2025	80

The Company's equity comprises share capital and retained earnings:

EUR '000	31 December 2025
Share capital	80
Retained earnings	798
Net equity	878

15. Related party transactions

The Company's related parties include the parent company, companies related to the parent company and the management of the Company or of the parent. This includes close family members of the management of the Company and of Multitude AG, the companies in which the management of the Company or of Multitude AG, and their close family members have control or joint control. In principle, all transactions with related parties are conducted at arm's length and are part of the ordinary course of business.

Transactions with related parties are as follows:

EUR '000	31 December 2025	31 December 2024
MULTITUDE AG (PARENT COMPANY)		
Interest income	9,395	4,968
Guarantee fee	(240)	(120)
Expected credit loss	(2)	(271)
Total	9,153	4,577

Outstanding balances arising from the above transactions with related parties are as follows:

EUR '000	31 December 2025	31 December 2024
MULTITUDE AG (PARENT COMPANY)		
Gross amount of the loan	74,854	74,320
Expected credit loss	(273)	(271)
Net amount	74,581	74,049

Terms of the loan with parent company

The loan agreement with Multitude AG is structured with a total loan limit of EUR 150 million. The interest rate applied to the loan is based on the 3-month EURIBOR, with an additional coupon rate of 10.65% and a discount of 0.50%. The loan is set to be fully repaid on its maturity date, which is 27 June 2028, in the form of a bullet payment.

Guarantee of the bond

Multitude AG has provided a remunerated guarantee to Multitude Capital in relation to its obligations under the bond issuance. The guarantee is structured as a joint and several, irrevocable, and unconditional guarantee, under which Multitude AG acts as principal obligor and guarantees the full and punctual payment of all obligations, including the payment of principal and interest under the terms and conditions of the bond, when due. These obligations cover payment at maturity, by acceleration, redemption, or otherwise, including interest on overdue amounts and all other monetary obligations under the terms and conditions of the bond.

Key terms of the guarantee include:

- **Nature of the Guarantee:** Multitude AG guarantees, as if it were its own debt, all of Multitude Capital's obligations to bond-holders, including principal and interest payments, under the terms and conditions of the bond.
- **Indemnity:** Multitude AG agrees to indemnify bondholders against any losses arising from the non-payment, invalidity, or unenforceability of Multitude Capital's obligations.
- **Continuing Obligations:** The guarantee remains in full force and effect despite any extension, renewal, or refinancing of the obligations, any failure to enforce claims against Multitude Capital, or any other modifications or releases of liability under the terms and conditions of the bond.

This guarantee is a continuing obligation and will remain effective until all obligations under the bond are fully discharged.

16. Events after the reporting period

On 11 March 2026 Multitude Capital Oyj placed EUR 70 million in subordinated perpetual capital notes, under a framework of EUR 120 million (ISIN NO0013726893). The notes carry a floating rate coupon of 3-month EURIBOR plus 8.90% and were priced at 96.00% of the nominal amount. The issuance is guaranteed by Multitude AG.

The settlement took place on 23 March 2026. The notes are intended to be listed on a regulated market within four months of the announcement, and the Frankfurt Stock Exchange Open Market. The net proceeds were used to finance Multitude AG's outstanding EUR 45 million perpetual capital notes with ISIN NO0011037327, as well as for general corporate purposes. In addition, holders of existing perpetual bonds with an aggregate nominal amount of approximately EUR 19.2 million participated in an exchange, swapping their existing bonds for the newly issued capital notes.

Approval of financial statements and the Board of Directors' report

The financial statements, prepared in accordance with the applicable accounting regulations, give a true and fair view of the Company in terms of assets, liabilities, financial position, and profit and loss.

The management report provides an accurate description of the development and results of the Company's operations. It also includes a description of significant risks, uncertainties, and other aspects of the Company's state.
