Interim Management Report 9M 2026

Multitude AG in brief

Multitude is a listed European FinTech providing digital lending, banking, and payment services to consumers, small and medium-sized enterprises (SMEs), institutional clients, and other FinTechs that are often overlooked by traditional banks. With around 400,000 customers across Europe, Multitude serves individuals and businesses whose needs are not fully addressed by conventional financial institutions, often due to rigid processes or limitations in risk assessment frameworks.

Many traditional banks and newer digital challengers lack the combination of data, technology, and long-term underwriting experience required to serve these segments efficiently and at scale. Multitude addresses this gap through a fully digital, data-driven platform, combining advanced credit risk models, proprietary technology, and a customer-centric operating model.

This approach enables fast decision-making, scalable operations, and tailored financial solutions across consumer, SME, and institutional markets, positioning Multitude as a diversified FinTech platform focused on profitable growth and long-term value creation.

COMPANY FACTS

ferratum CapitalBox MULTITUDE BANK

We provide our services via our three business units operating in Consumer Banking through the “Ferratum” brand, SME Banking through the “CapitalBox” brand and Wholesale Banking through the “Multitude Bank” brand.

Full European banking licence

Founded in Finland in 2005

Listed on the Frankfurt Stock Exchange

Multitude AG is listed on the Prime Standard segment of the Frankfurt Stock Exchange under the ticker symbol “MULT” (WKN: A40VJN, ISIN: CH1398992755).

€197.1m	~400K	~750	17
9M Group Revenue*	Customers	Employees	European Countries

Multitude provides services in 17 European countries. At the end of Q3, our Group employed 728 people (thereof, 30 employees of Sortter Oy, a company acquired in May 2026). The Group includes Multitude Bank p.l.c., a wholly owned subsidiary fully licensed and regulated by the Malta Financial Services Authority (MFSA). This licence empowers us to offer a comprehensive suite of financial products and services to customers throughout the European Economic Area (EEA), enabling us to effectively serve a diverse and dynamic European customer base with local expertise and cross-border capabilities.

* Revenue of the Group includes interest income generated by financial assets and fee and commission income earned from provision of services.

Business unit:
Consumer Banking

The Consumer Banking business unit provides digital lending, banking, and comparison services to consumers. Through a fully digital, data-driven operating model, it serves customers whose financial needs are often not fully addressed by traditional financial institutions. By combining proprietary technology, advanced risk models, and automated decision-making, the business unit delivers fast, convenient, and transparent financial solutions.

Following the acquisition of Sortter Oy, the business unit also includes the leading Finnish financial services comparison platform. Sortter continues to operate independently under its established brand, platform model and management team, while its financial results are consolidated within the Consumer Banking business unit, contributing an incremental fee income stream to the Group in line with its revenue diversification strategy.

At the end of 9M 2026, the Consumer Banking business unit operated in 13 European markets: Bulgaria, Croatia, Czechia, Denmark, Estonia, Finland, Germany, Latvia, Norway, Poland, Romania, Slovenia, and Sweden.

Instalment Products

The instalment loan product provides consumers with financing from EUR 300 to EUR 15,000, repayable in instalments over terms ranging from 2 months to 6 years. It serves a range of borrowing needs, from short-term expenses to larger purchases such as home renovations and cars.

Revolving Products

Credit Limit

Credit Limit, the Consumer Banking's most popular product, is a revolving line of credit that offers ongoing financial flexibility. Eligible customers are pre-approved for up to EUR 5,000 and can withdraw and repay funds flexibly, without fixed amounts or repayment schedules.

Credit Card

The Credit Card, a Mastercard® without annual or monthly fees, allows financing purchases of up to EUR 5,000. Customers can also use the card as a flexible credit facility by withdrawing money from it directly into their bank account, a feature that is growing in popularity among customers.

Business unit:
SME Banking

The SME Banking business unit provides essential financial solutions to SMEs through its Credit Lines and Instalment Loans under the CapitalBox brand. Its secured and unsecured products support SMEs in every growth stage, from managing working capital to funding investments and expanding their operations.

Decision of funding can be made available to SMEs within minutes of application approval through a streamlined, fully digitalised process. This speed and efficiency positions SME Banking as the perfect ally for meeting short-term business financing requirements. Combining advanced technology, experience and Multitude's internal growth platform resources, the business unit provides reliable SME financing, with funds disbursed swiftly once an offer is approved.

At the end of 9M 2026, SME Banking operates in five markets: Finland, Sweden, Denmark, Lithuania, and the Netherlands, offering five distinct products.

Instalment Loan
One of SME Banking's key offerings is its Instalment Loan, which is offered through both unsecured (up to EUR 350,000) and secured (up to EUR 3 million) facilities. These loans come with flexible repayment periods spanning from 6 to 48 months. They are tailored to assist SMEs in funding operations such as simple inventory management, marketing efforts, hiring new personnel, investments and acquiring equipment. On average, businesses borrow around EUR 27,000 (unsecured loans) with a typical duration of 28 months.

Secured Loan
The Secured Loan is designed to support larger investments to drive growth for SMEs, addressing a gap in the industry where smaller FinTech firms might lack capacity, and traditional banks might choose not to provide secured loans. Part of the business unit's unique selling proposition is that it can offer loans up to EUR 3 million for SMEs, while keeping a digital and streamlined process.

Credit Line
The Credit Line is a dynamic form of financing that grants SMEs with access to a credit limit ranging from EUR 2,000 to EUR 150,000. The credit can be given in minutes through a digital application and used by the customer when finances are needed for everyday operations. Additionally, CapitalBox collaborates with retail partners to offer financing solutions to their business customers, enabling them to make financed purchases right at the point of sale.

Invoice Purchasing
In 2024, SME Banking acquired the business of Danish company Omniveta and launched a fully digital invoice purchasing solution for SMEs. The business provides non-recourse financing for invoices with due periods ranging from 8 to 120 days.

Purchase Finance (BNPL)
Buy Now, Pay Later (BNPL) is a product explicitly designed for SMEs. This financial solution provides businesses with flexible access to funding of up to EUR 20,000 without collateral for a period of up to 36 months. Currently available in Finland and Sweden, the product is strategically designed to help SMEs manage cash flow effectively, allowing them to invest in growth opportunities and finance purchases without relying on their daily capital or experiencing immediate financial strain.

Business unit:
Wholesale Banking

MULTITUDE BANK

Wholesale Banking is the Group's newest business unit, created in response to an identified market need for institutional financing, targeted at profitable, technology-enabled non-bank lenders. The business unit subsequently expanded its portfolio to cover real-asset lending, with loans secured initially by immovable property and, more recently, by selected movable assets. Target customers are institutions seeking bespoke financial solutions, to whom the unit offers two main products: Secured Debt and Payment Solutions.

Wholesale Banking serves corporate borrowers and non-bank lenders, including technology enabled lending platforms (FinTech firms), real-estate sponsors (developers, asset owners and operators), and companies with asset-backed funding needs, such as owners of immovable property and selected movable assets. Wholesale Banking operations target all European markets, with engagements led by a dedicated team of specialists possessing strong local market expertise.

The business unit applies an individualised structuring approach to transactions, supported by defined approval and monitoring processes. A selective origination strategy focuses on predefined target segments and risk parameters, supporting the controlled expansion of product offerings and market activities.

Secured Debt Solutions
Secured Debt originates and executes asset-backed transactions with a typical minimum volume of EUR 5 million. In portfolio financing for technology-enabled non-bank lenders, facilities are provided for new originations, acquisitions and refinancing, secured by loan portfolios and related receivables.

In real-asset lending, the unit provides financing in the Nordics, Baltics and DACH region, primarily for acquisitions, refinancing, redevelopment and capital expenditure projects with a typical minimum volume of EUR 1 million. Collateral typically includes immovable property and, where legally enforceable, selected movable assets. Underwriting is based on covenant structures, defined repayment strategies and ongoing portfolio monitoring.

The unit builds long-term partnerships on these mandates, assigning dedicated specialist teams to complex requirements and structuring case-by-case. Continuous investment in risk analytics and workflow technology enhances flexibility, reduces risk, and shortens time to close while maintaining service quality.

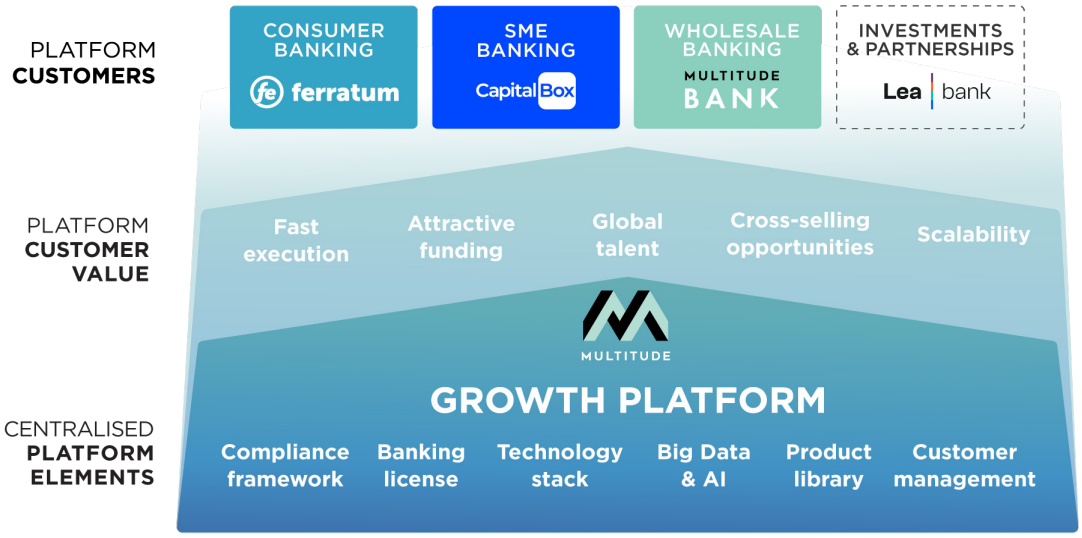

Payment Solutions
Payment Solutions offer institutional clients a seamless and secure infrastructure for transaction processing and financial operations. With a deep understanding of the evolving payment landscape, Wholesale Banking provides end-to-end solutions that enable efficient transaction processing and support long-term growth and operational efficiency for financial institutions.

Our Strategy

To deliver its long-term ambitions, Multitude follows a three-pillar growth strategy based on organic growth, partnerships, and selective M&A. This framework supports disciplined scaling of the FinTech platform, revenue diversification, and sustainable profitability. Organic growth is driven by scaling existing capabilities across all business units through increased use of data, AI, and automation, process simplification, and product expansion, with Wholesale Banking playing a key role as a scalable growth engine. Partnerships enable capital-light expansion through embedded-finance and ecosystem integrations, while selective M&A accelerates market entry and capability build-out where strategic fit and returns are compelling. Together, these pillars underpin Multitude's sixth strategy cycle, focused on scaling a diversified FinTech platform with disciplined execution. The acquisition of Sortter Oy during 9M 2026 reflects the execution of this strategy by strengthening the Group's Growth Platform and adding an incremental fee income stream.

Multitude growth platform

Multitude's growth platform underpins scalable and disciplined execution across all business units. Built in-house and supported by selected partners, it combines automation, data, and real-time monitoring to enable efficient scaling while maintaining strong control and risk oversight. Proprietary credit and data models, supported by deep regulatory expertise across European markets, provide a durable foundation for consistent risk-adjusted growth and capital deployment.

9M 2026 Key Highlights

- Group revenue increased by EUR 1.2 million and profit by EUR 2.0 million compared with 9M 2025
- Combined loans to customers and debt investments surpassed EUR 1.0 billion
- Net fee and commission income continued to scale, reaching EUR 22.3 million from EUR 8.0 million in the comparative period
- The Group's share of the results of associates contributed EUR 3.0 million to profit before income taxes in 9M 2026, compared with EUR 2.0 million in 9M 2025
- Impairment losses improved significantly, decreasing by 16.8% year-on-year to EUR 51.2 million
- Successfully issued EUR 70.0 million of perpetual notes, classified as equity under IFRS, to finance the Group's operations
- Group acquired an additional 80.03% equity stake in Sortter Oy, a leading Finnish financial services comparison platform, making it a wholly owned subsidiary

Key figures and ratios

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025

Total equity	231,653	207,968

Alternative performance measures

Pursuant to Article 16 of Regulation 1095 / 2010 / EU, the European Securities and Markets Authority (ESMA) has issued specific guidelines on the presentation criteria for Alternative Performance Measures (APMs) included by European issuers in regulated information, where such measures are not defined or provided for in the rules on financial reporting.

According to the definition provided in the ESMA Guidelines, an APM is a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework. APMs are typically based on financial statement line items prepared in accordance with applicable financial reporting rules. What sets them apart is that APMs are not defined in the financial reporting framework, yet their use is still widespread, with the role of conveying a view of the Group's performance that is closer to the Leadership Team's perspective than would be possible using only the defined measures. In this regard, the presented APMs are complementary to the measures defined within the IFRS Accounting Standards.

The Group reports revenue, impaired loan coverage ratio, cost-to-income ratio, return on tangible equity, net equity ratio and net debt-to-equity ratio as APMs. These indicators provide valuable insights into the financial health of the Group beyond the International Financial Reporting Standards (IFRS) measures.

Revenue is defined as sum of interest income and fee and commission income. Revenue for 9M 2026 amounted to EUR 197.1 million (9M 2025: EUR 195.9 million). The impaired loan coverage ratio, for instance, is used to assess the Group's ability to cover impaired loans through provisions, reflecting credit risk management efficiency. The cost-to-income ratio reflects the proportion of operating income consumed by operating expenses and is an indicator of the Group's operational efficiency.

Return on tangible equity reflects the Group's ability to generate returns for its owners excluding investment in intangible assets and goodwill. The net equity ratio is vital in evaluating the capital structure and financial stability of the Group, as well as compliance with bond covenant used in capital management. The net debt-to-equity ratio offers insight into the Group's leverage and its ability to meet long-term obligations.

Financial ratios	Q3 2026	9M 2026	Q3 2025	9M 2025
Cost-to-income ratio, in %	54.7	54.0	50.1	48.0
Return on tangible equity, in %	27.8	19.8	18.1	19.6

Financial ratios	30 September 2026	31 December 2025
Impaired loan coverage ratio, in %	11.5	12.8
Net equity ratio, in %*	22.1	21.8
Net debt-to-equity ratio	4.07	4.20

* The definition of net equity ratio is in accordance with the terms and conditions of the 2024 Multitude Capital Oyj senior unsecured bonds and the 2026 Multitude Capital Oyj subordinated perpetual floating rate callable capital notes.

Calculation of financial ratios:

EUR '000			Q3 2026	9M 2026	Q3 2025	9M 2025
Cost-to-income ratio (%) =	100x	- (General and administrative expense + personnel expense + depreciation and amortisation + selling and marketing expense + other expense)	32,642	90,484	26,187	78,100
		Net interest income + net fee and commission income + fair value and foreign exchange gains and losses (net) + other income + share of results of associates	59,681	167,570	52,252	162,867
Return on tangible equity (%)* =	100x	Profit for the period – Perpetual bonds interests (net of tax)	7,516*4	17,796 /0.75	5,397*4	17,439 /0.75
		Average total equity – Average intangible assets – Average goodwill – Average perpetual bonds	107,976	119,566	119,158	118,656

* Annualised.

EUR '000			30 September 2026	31 December 2025
Impaired loan coverage ratio (%) =	100x	Loss allowances	121,190	121,643
		Gross loans to customers	1,056,955	953,687
Net equity ratio (%) =	100x	Total equity + nominal Tier 2 notes	259,706	236,019
		Total assets – cash and cash equivalents	1,487,170 - 312,020	1,385,586 – 304,177

Key developments and progress in 9M 2026

Significant events during the reporting period

Treasury update

In January 2026, Fitch Ratings affirmed Multitude AG's Long-Term Issuer Default Rating (IDR) at 'B+' with a Stable Outlook and upgraded the Group's Standalone Credit Profile (SCP) to 'bb-' from 'b+'. Fitch also upgraded the Long-Term IDR of Multitude Bank p.l.c., a subsidiary of Multitude AG, to 'BB-' from 'B+'. Multitude Capital Oyj's senior unsecured notes were affirmed at 'B+' with a Recovery Rating of 'RR4', while Multitude AG's subordinated hybrid perpetual capital notes were affirmed at 'B-' with a Recovery Rating of 'RR6'.

In March 2026, Multitude Capital Oyj successfully issued EUR 70.0 million subordinated perpetual floating rate callable capital notes (ISIN: NO0013726893) qualifying as IFRS equity ("2026 perpetual notes"). In connection with this issuance, holders of the existing 2021 Multitude AG perpetual notes (ISIN: NO0011037327) were offered the option either to exchange their holdings for the 2026 perpetual notes or to settle them in cash under a tender offer, in each case at a price of 102.00%. Following completion of the exchange and repurchases, the outstanding nominal amount of the 2021 Multitude AG perpetual notes amounted to EUR 17.6 million. The net proceeds from the issuance were used for the refinancing of the 2021 Multitude AG perpetual notes, with the remaining proceeds available for general corporate purposes. Fitch Ratings assigned the notes a final long-term rating of 'B-' and a Recovery Rating of 'RR6'.

On 5 July 2026, Multitude AG completed the full redemption of the existing 2021 Multitude AG perpetual notes with an aggregate nominal amount of EUR 17.6 million. The notes were redeemed at nominal value, together with accrued but unpaid interest up to, but excluding, the redemption date, amounting to EUR 17.8 million. Settlement was effected on 6 July 2026 to noteholders of record as at 2 July 2026. Following redemption, the notes were delisted from Nasdaq Stockholm and the Open Market of the Frankfurt Stock Exchange.

Leadership changes

In April 2026, Multitude AG announced that Wholesale Banking Business Unit CEO Alain Nydegger stepped down by mutual agreement effective 30 April 2026 to pursue entrepreneurial activities outside the Group. Multitude CEO Antti Kumpulainen assumed the role of interim Business Unit CEO to ensure continuity until a successor is appointed. The transition in Wholesale Banking business unit does not affect the Group's 2026 guidance or strategic direction.

Annual General Meeting 2026

On 24 April 2026, Multitude AG's Annual General Meeting approved the 2025 combined management report, separate and consolidated financial statements, and ESG reports, and accepted the auditors' reports. Shareholders resolved to distribute an ordinary dividend of EUR 0.55 per share for the 2025 financial year, with a dividend record date of 28 April 2026. The dividend was paid on 4 May 2026, net of applicable withholding tax, while the remaining earnings will be carried forward. The AGM also reappointed PricewaterhouseCoopers AG as auditors for 2026 and approved the 2025 remuneration report in a consultative vote, along with remuneration limits for the Board of Directors and the Group Executive Board.

Acquisition of Sortter Oy

On 20 May 2026, Multitude signed an agreement to acquire the remaining 80.03% equity interest in Sortter Oy ("Sortter") for a cash consideration of EUR 7.0 million, following an initial 19.97% investment made in 2023. Sortter is a Finnish FinTech company established in 2018, specialising in consumer and SME financing comparison services. Following the transaction, the company will operate independently under its established brand, platform model, and management team, continuing to manage its operations, customer relationships, and data. Sortter has been consolidated into the Group from 20 May 2026, and its results are reported within the Consumer Banking business unit.

Financial overview

Results of operations

The Group's profit for the period amounted to EUR 22.3 million (9M 2025: EUR 20.3 million), an increase of EUR 2.0 million year-on-year. The increase reflected improved asset quality, strong growth in fee and commission income and positive contributions from strategic investments and acquisitions, partly offset by lower interest income and higher operating expenses arising from investments in future growth.

Interest income decreased to EUR 172.7 million in 9M 2026 from EUR 186.6 million in 9M 2025, primarily due to lower interest income from loans to customers, which declined to EUR 160.2 million from EUR 174.1 million. The decrease reflected changes in the product offering and portfolio composition as the Group continued to prioritise sustainable and profitable growth and asset quality over revenue growth. This impact was offset by strong growth in fee and commission income, the gain on remeasurement to fair value of the Group's previously held equity interest in Sortter Oy as part of the step acquisition, and a net fair value gain on contingent consideration arrangements.

Interest expense increased slightly to EUR 35.0 million in 9M 2026 (9M 2025: EUR 33.3 million), a year-on-year rise of EUR 1.7 million. The increase reflected higher interest expense on debt securities and customer deposits. Interest expense on debt securities increased mainly because:

- the 2025 Multitude Bank p.l.c. floating-rate callable Tier 2 Notes were outstanding throughout 9M 2026, whereas they contributed to the comparative period only from their issuance on 10 March 2025; and
- additional issuances of 2024 Multitude Capital Oyj senior unsecured bonds with a nominal amount of EUR 3.0 million, which were initially subscribed by the issuer.

Deposit-related costs remained the largest component of interest expense, totalling EUR 25.4 million (9M 2025: EUR 24.4 million) and representing 72.6% of total interest expense (9M 2025: 73.3%). The increase reflected growth in the deposit base, partly offset by lower market interest rates following ECB rate cuts over the preceding year. Customer deposits remained the Group's principal source of funding and supported continued balance-sheet growth.

Fee and commission income increased to EUR 24.5 million in 9M 2026 (9M 2025: EUR 9.3 million), reflecting continued progress in diversifying the Group's revenue base and expanding capital-light, recurring income streams. Growth was driven primarily by loan servicing activities provided to the third-party owner of the subsidiaries divested in 2025, which contributed EUR 8.1 million in the current period (9M 2025: EUR 2.4 million), and by the expansion of brokerage activities following the acquisition of Sortter Oy, which increased brokerage fee income to EUR 14.1 million (9M 2025: EUR 5.3 million). Consequently, fee and commission income represented 12.4% of total revenue (9M 2025: 4.8%), demonstrating the growing contribution of non-lending activities to the Group's revenue mix.

Following the 2025 divestments, the remeasurement of the related contingent consideration receivable at the end of 9M 2026 resulted in a net gain of EUR 3.9 million, compared with a net loss of EUR 0.1 million in 9M 2025. Fair value changes in the receivable are presented within fair value and foreign exchange gains and losses (net). Overall, this line item improved to a gain of EUR 1.9 million in 9M 2026, compared with a loss of EUR 2.8 million in 9M 2025.

The Group's strategic investments in associates contributed EUR 3.0 million to profit before income taxes in 9M 2026, compared with EUR 2.0 million in 9M 2025. Following the acquisition of control over Sortter Oy, the Group discontinued the equity method on the acquisition date. In accordance with IFRS 3, the Group remeasured its previously held equity interest in Sortter Oy to fair value as at 20 May 2026 and recognised a gain of EUR 2.5 million within other income, based on a provisional fair value measurement that may be adjusted upon completion of independent valuation.

The Group's asset quality continued to improve, with impairment losses decreasing to EUR 51.2 million, down 16.8% (EUR 10.3 million) from EUR 61.5 million in 9M 2025. The reduction reflected the continued execution of the Group's portfolio optimisation strategy and enhancements to its credit risk management capabilities, supported by:

- enhanced underwriting through new data integrations and ongoing improvements to risk models;
- disciplined, return-based capital allocation, including reduced exposure to higher-risk short-term products and reallocation towards more stable, longer-tenor assets; and
- changes in portfolio composition, including a greater focus on secured lending and disposal of short-term portfolios.

These measures continued to strengthen the Group's risk profile, improve portfolio quality and support a more sustainable, quality-driven growth.

In 9M 2026, the Group continued to invest in strategic initiatives intended to support future growth, scalability and operational efficiency. These investments in infrastructure, technology and people, together with integration and organisational development activities, resulted in a temporary increase in operating expenses across the principal cost categories.

Personnel expense increased by EUR 0.4 million to EUR 30.0 million (9M 2025: EUR 29.6 million), as higher wages and salaries following salary revisions and organisational changes were partly offset by lower headcount resulting from process improvements and automation. General and administrative expenses increased by EUR 3.3 million to EUR 31.9 million, mainly due to the inclusion of the acquired business's expenses following its consolidation and higher regulatory costs. Selling and marketing expense increased by EUR 6.9 million to EUR 16.6 million (9M 2025: EUR 9.7 million), driven mainly by marketing expenditure of the acquired business and higher partnership and commission costs not directly attributable to the origination of financial assets.

Depreciation and amortisation increased by EUR 2.0 million to EUR 11.9 million (9M 2025: EUR 9.9 million), primarily reflecting higher amortisation of intangible assets arising from the Group's continued investment in technology and infrastructure and from the business combination.

Basic earnings per share amounted to EUR 0.79 in 9M 2026, compared with EUR 0.81 in 9M 2025. Despite the year-on-year increase of profit attributable to owners of the parent company, earnings per share decreased due to distributions and other amounts recognised directly in equity in connection with perpetual notes classified as equity under IFRS.

The Group's effective tax rate was 13.9% in 9M 2026 (9M 2025: 13.1%; full year 2025: 13.4%).

Results of operating segments

The Consumer Banking business unit:
Consumer Banking delivered a resilient performance in the first nine months of 2026, supported by continued loan portfolio growth, the increasing contribution of recurring fee income and further improvements in asset quality. Interest income decreased by 15.2% (EUR 22.2 million), from EUR 146.3 million in 9M 2025 to EUR 124.1 million in 9M 2026. The decrease primarily reflected the impact of the 2025 divestments, product offering changes in certain markets and the continued wind-down of microlending activities.

The decline in interest income was partly offset by growth in fee and commission income, which increased from EUR 7.7 million in 9M 2025 to EUR 22.4 million in 9M 2026. The business unit also recognised a net gain of EUR 3.9 million from the remeasurement of contingent consideration, compared with a loss of EUR 0.1 million in 9M 2025, and a gain of EUR 2.5 million from the remeasurement to fair value of the Group's previously held equity interest in Sortter Oy following the acquisition of control. The growth of fee and commission income increased the contribution of non-lending activities to the business unit's revenue and supported a more diversified revenue mix.

The loan portfolio increased by 6.5%, from EUR 529.8 million at year-end 2025 to EUR 564.3 million as at 30 September 2026. At the same time, impairment losses on loans decreased by 19.0%, from EUR 52.1 million in 9M 2025 to EUR 42.2 million in 9M 2026. The reduction reflected continued improvements in portfolio quality, supported by enhanced underwriting, ongoing development of risk models and changes in portfolio composition, including reduced exposure to higher-risk short-term lending products.

EBT amounted to EUR 24.7 million in 9M 2026 (9M 2025: EUR 24.2 million), representing a year-on-year increase of 2.1%. The business unit's performance benefited from an improving revenue mix, lower credit losses and a positive contribution from the business combination. Consumer Banking also continued to invest in technology, automation, data capabilities and artificial intelligence to improve the scalability of its operating model, strengthen credit risk management and support long-term operational efficiency.

The SME Banking business unit:
CapitalBox reported a loss before tax of EUR 3.9 million in 9M 2026, compared with a loss of EUR 2.7 million in 9M 2025. The business unit's performance remained below management's expectations, primarily due to loan originations being lower than forecast. Although the loan portfolio continued to expand, the pace of growth was below the level anticipated by management.

Reduction in EBT reflects a temporary investment phase to support future growth through organisational transformation, product development and technology investments. These initiatives

resulted in a temporary increase in operating expenses during the period but are intended to strengthen the operating platform and support future growth.

During 9M 2026, SME Banking's loan portfolio increased by 2.8%, from EUR 165.4 million at year-end 2025 to EUR 170.0 million as at 30 September 2026. Interest income increased by 2.4% (EUR 0.6 million) to EUR 26.7 million, reflecting the expansion of the loan portfolio.

Impairment losses decreased slightly to EUR 7.7 million in 9M 2026 (9M 2025: EUR 7.9 million). While the business unit's financial performance remained below management's expectations, it was broadly stable compared with the previous quarters of the current year. Management continues to focus on transitioning CapitalBox to sustainable profitability by improving loan origination volumes, portfolio quality and operating efficiency while maintaining disciplined credit underwriting.

The Wholesale Banking business unit:
Building on its performance in 2025, Wholesale Banking maintained its growth momentum in 9M 2026 across Secured Debt and Payment Solutions. The business unit continued to expand its sales presence across Europe, supported by the development of local teams. This enabled more targeted client engagement and supported the execution of growth opportunities in selected regional markets.

The investment portfolio remained well protected, with credit facilities supported by collateral. Fee and commission income from Payment Solutions reached EUR 2.1 million in 9M 2026 (9M 2025: EUR 1.6 million), in line with management's expectations. The increase was driven by greater utilisation of the business unit's embedded financial services.

The combined portfolio of loans to customers and debt investments increased by 21.7%, from EUR 244.0 million at year-end 2025 to EUR 296.8 million as at 30 September 2026. Consistent with the expansion of the portfolio, interest income increased by 54.1% to EUR 21.8 million (9M 2025: EUR 14.2 million).

Impairment losses decreased to EUR 1.3 million in 9M 2026 from EUR 1.5 million in 9M 2025. The combination of portfolio growth and lower impairment losses reflected the business unit's continued focus on secured exposures and prudent credit selection.

EBT increased to EUR 5.1 million in 9M 2026 from EUR 1.8 million in 9M 2025, reflecting portfolio growth, higher revenue and cost efficiency. The improvement demonstrates the increasing earnings contribution of Wholesale Banking as the business unit continues to scale its Secured Debt and Payment Solutions activities.

Net assets and financial position

Net assets

The Group's total assets increased by 7.3% (EUR 101.6 million), from EUR 1,385.6 million at year-end 2025 to EUR 1,487.2 million at the end of 9M 2026. Loans to customers continued to expand, increasing by EUR 103.7 million from EUR 832.0 million as at 31 December 2025, reflecting continued business growth. Debt investments decreased by EUR 11.7 million from EUR 107.1 million as at 31 December 2025, primarily due to repayments by obligors. Cash and cash equivalents increased by EUR 7.8 million, driven by funding inflows and prudent liquidity management. The strengthened liquidity position provides the Group with additional capacity to support the continued expansion of its loan portfolio while maintaining financial flexibility.

Other financial assets decreased to EUR 50.9 million as at 30 September 2026, a decline of EUR 9.7 million from EUR 60.6 million at year-end 2025. The decrease was primarily due to the elimination on consolidation of loan to Sortter following the acquisition of control, amounting to EUR 8.0 million, cash collections of contingent consideration of EUR 11.1 million and a reduction in receivables from sold portfolios. These movements were partly offset by a net fair value gain of EUR 3.9 million on the remeasurement of contingent consideration and an increase in trade receivables arising from the continued growth of non-lending revenue activities.

The number of shares held by the Group in Lea Bank AB, an associate, remained unchanged during 9M 2026. The Group's ownership interest was 29.44% as at 30 September 2026 (31 December 2025: 29.68%), with the marginal decrease resulting from changes in the associate's total number of outstanding shares.

The carrying amount of investments in associates was EUR 27.4 million as at 30 September 2026, a decrease of EUR 1.8 million from EUR 29.2 million at year-end 2025. The movement during the period comprised:

- increase due to share of results amounting to EUR 3.0 million;
- decrease due to share of other comprehensive loss amounting to EUR 0.1 million;
- decrease by EUR 1.4 million following the acquisition of control over Sortter Oy, resulting in the discontinuation of equity method accounting for the previously held equity stake;
- decrease due to exchange differences on foreign operation translation amounting to EUR 1.4 million, and
- reduction of EUR 1.9 million relating to dividends declared by Lea Bank AB, treated as a return of investment under the equity method.

The acquisition of control over Sortter Oy resulted in the recognition of the following significant assets. The amounts below are provisional and may be adjusted during the measurement period as the purchase price allocation is finalised:

- trade receivables of EUR 2.3 million;
- identifiable intangible assets with an acquisition-date fair value of EUR 8.0 million; and
- goodwill of EUR 7.5 million.

Liabilities

Total liabilities increased by 6.6% (EUR 77.9 million), from EUR 1,177.6 million at year-end 2025 to EUR 1,255.5 million as at 30 September 2026. The increase was primarily driven by continued customer demand for the Group's deposit products. Accordingly, deposits from customers increased by 6.5% (EUR 67.2 million) to EUR 1,101.7 million at the end of the period, providing additional funding capacity to support the continued growth of the Group's lending activities.

Debt securities increased by EUR 4.5 million, primarily due to the placement with third parties during the period of 2024 Multitude Capital Oyj senior unsecured bonds previously held within the Group, with a nominal amount of EUR 3.0 million. The remainder of the increase was attributable to the accrual of interest expense. Other financial liabilities remained broadly stable during the reporting period. Other liabilities increased from EUR 6.0 million as at 31 December 2025 to EUR 10.5 million as at 30 September 2026, mainly due to higher liabilities for taxes other than income tax.

As a result of the acquisition of Sortter Oy, the Group recognised a deferred tax liability of EUR 0.5 million, representing the net effect of taxable temporary differences arising mainly from acquisition-date fair value adjustments to the identifiable assets acquired and recognised tax losses carried forward. The deferred tax liability was subsequently remeasured to EUR 0.7 million, reflecting the tax effects of post-acquisition amortisation of fair value adjustments and the utilisation of tax losses against Sortter Oy's taxable profits.

Equity
Total equity increased by 11.4% (EUR 23.7 million), from EUR 208.0 million at year-end 2025 to EUR 231.7 million as at 30 September 2026. The increase was driven by profit generated during the period and the issuance of perpetual notes classified as equity under IFRS. These increases were partly offset by the EUR 11.8 million dividend distributed in respect of the 2025 financial year, the full redemption of Multitude AG's 2021 perpetual notes, and interest and transaction costs on perpetual notes recognised directly in equity.

In March 2026, the Group launched exchange and tender offers to the holders of the outstanding EUR 45.0 million existing 2021 Multitude AG perpetual notes. Following the issuance by Multitude Capital Oyj of EUR 70.0 million in subordinated perpetual capital notes (ISIN: NO0013726893) qualifying as IFRS equity, the Group repurchased or exchanged existing notes for these newly issued equity instruments. Overall, existing notes with a nominal amount of EUR 8.1 million were repurchased (comprising EUR 3.3 million under the tender offer and EUR 4.8 million through additional repurchases), and EUR 19.3 million were exchanged into the new 2026 perpetual notes. All transactions were executed at a price of 102.00%.

In July 2026, Multitude AG completed the full redemption of the existing 2021 Multitude AG perpetual notes with an aggregate nominal amount of EUR 17.6 million. The notes were redeemed at nominal value, together with accrued but unpaid interest up to, but excluding, the redemption date, amounting to EUR 17.8 million. Following redemption, the notes were delisted from Nasdaq Stockholm and the Open Market of the Frankfurt Stock Exchange.

In connection with the transactions outlined above, equity was reduced by the following:

- Discount on issuance of perpetual capital notes amounting to EUR 2.8 million;
- Directly attributable transactions costs on issuance amounting to EUR 1.5 million;
- Premium on redemption amounting to EUR 0.5 million, and
- Interests paid during the period amounting to EUR 5.7 million.

These capital management actions strengthened the Group's capital base and support the execution of its growth strategy. Related tax effects arising from these transactions also contributed positive EUR 1.2 million to the movements in equity at the time of deduction in accordance with Finnish tax law.

In February 2026, Multitude launched another All-Employee Shareholder Programme, where all eligible employees were entitled to receive 50 free Multitude shares. A total of 494 participants took the opportunity to join the programme, and the company distributed 24,700 shares. In addition, 17,773 shares vested under the Matching Share Plan during the first nine months of 2026.

Liquidity
Cash and cash equivalents increased by EUR 7.8 million, from EUR 304.2 million at 31 December 2025 to EUR 312.0 million at the end of 9M 2026. The minor increase was primarily driven by operating cash inflows and supported by cash inflows from financing activities.

Net cash inflow from operating activities amounted to EUR 4.7 million (9M 2025: EUR 75.9 million), primarily driven by interest received amounting to EUR 165.7 million (9M 2025: EUR 189.9 million) and the continued strong uptake of the Group's customer deposit offerings. These inflows were partly offset by the ongoing reinvestment into loan to customers portfolio, which continued to expand and by the higher interest paid in 9M 2026 (EUR 28.6 million) compared to 9M 2025 (EUR 24.5 million).

Net investing cash outflow was EUR 0.3 million in 9M 2026 (9M 2025: EUR 27.7 million), mainly reflecting no new investments in associates (9M 2025: EUR 19.3 million outflow). The acquisition of Sortter Oy's remaining interest resulted in a EUR 3.5 million net outflow (EUR 7.0 million consideration less EUR 3.5 million cash acquired). This was partly offset by EUR 11.1 million in contingent consideration from 2025 subsidiary disposals (9M 2025: EUR 2.4 million net outflow from disposals, including contingent consideration proceeds of EUR 0.2 million). Investment in intangible assets was EUR 9.4 million (9M 2025: EUR 9.5 million).

Net cash inflow from financing activities amounted to EUR 3.7 million, compared with EUR 11.5 million in the comparative period. The following factors were the main drivers of the change:

- net cash inflows from the issuance and redemption of perpetual notes in 9M 2026, whereas no such transactions occurred in 9M 2025;
- higher cash outflows related to distributions on perpetual notes as a result of the increase in the outstanding balance of perpetual notes during the current period;
- lower cash inflows from the issuance of debt securities in 9M 2026 compared with 9M 2025; and
- higher dividend payments during the period compared with the prior period.

During 9M 2026, the issuance of 2026 Multitude Capital Oyj perpetual notes generated cash proceeds of EUR 46.3 million, after taking into account the exchange offer made to holders of the existing 2021 Multitude AG perpetual notes. In addition, the tender offer and subsequent repurchases of the existing 2021 Multitude AG perpetual notes, which ultimately resulted in their full redemption, generated a cash outflow of EUR 26.2 million during the period. Interests paid on perpetual notes increased to EUR 5.7 million during the period (9M 2025: EUR 3.9 million).

Net proceeds from the issuance of debt securities in 9M 2025 amounted to EUR 27.8 million, of which EUR 24.0 million related to the issuance of Tier 2 Notes by Multitude Bank p.l.c. The remaining proceeds were generated through subsequent issuances of 2024 Multitude Capital Oyj senior unsecured bonds. In 9M 2026, cash inflows from debt securities arose solely from subsequent issuances of 2024 Multitude Capital Oyj senior unsecured bonds with a nominal amount of EUR 3.0 million.

Multitude increased its dividend payments to EUR 11.8 million (9M 2025: EUR 9.4 million), reinforcing its positioning as a dividend-paying investment case.

Events after the reporting period

Placement of Additional Tier 1 capital bonds

On 6 November 2026, Multitude Bank p.l.c., a wholly owned subsidiary of Multitude AG, successfully completed the bookbuilding for its inaugural issuance of EUR 50.0 million of floating-rate perpetual Additional Tier 1 capital bonds (ISIN: NO0013771782). The bonds will be issued at 100.00% of their nominal amount and will bear a floating-rate coupon equal to 3-month Euribor, subject to a zero floor, plus 9.00% per annum. Interest is scheduled to be payable quarterly, subject to the terms and conditions of the bonds.

The bonds may be redeemed at the Bank's option, subject to regulatory approval, on the first call date five years after the issue date and on specified dates thereafter. Settlement is expected on or about 13 November 2026. The net proceeds are intended to strengthen the Bank's capital base and support general corporate purposes.

Leadership changes

On 11 November 2026, Multitude AG announced a leadership change in CapitalBox, its SME Banking business unit. Jesse Kaislavuo, previously Head of Process Transformation and Automation at

Multitude Group, succeeds Mantvydas Štareika as Tribe CEO of CapitalBox and joins the Group Leadership Team. Mantvydas Štareika will assume the role of Commercial Director, Real estate, in the Wholesale Banking business unit, and will step down from the Group Leadership Team. The changes are effective 12 November 2026.

Economic Environment and Outlook

Economic Environment

Broad Macroeconomic overview

During the first nine months of 2026, the European economic environment remained characterised by elevated geopolitical uncertainty and renewed inflationary pressures, primarily reflecting the energy shock arising from the conflict in the Middle East. The European Commission's Spring 2026 Economic Forecast projected EU GDP growth of 1.1% and euro area growth of 0.9% for 2026, while inflation was projected at 3.1% and 3.0%, respectively.

The euro area economy nevertheless demonstrated resilience during the period. Following broadly unchanged economic activity in Q1 2026, real GDP increased by 0.6% quarter-on-quarter in Q2, supported by domestic demand and exports. Available indicators pointed to continued growth in second half of the year, with activity improving across both manufacturing and services. The labour market also remained robust, with the unemployment rate at 6.4% in July, although employment growth moderated in the second quarter compared with the first quarter, partly reflecting a decline in inward migration.

Inflation remained elevated as higher energy prices continued to affect consumer prices. Euro area annual inflation, the Harmonised Index of Consumer Prices, stood at 3.2% in August 2026, while underlying inflationary pressures remained comparatively stable. The ECB's September projections foresee headline inflation averaging 3.0% in 2026, with risks remaining tilted to the upside, particularly in the event of further energy supply disruptions or stronger indirect effects of higher energy prices.

Monetary policy became more restrictive during the period. On 10 September 2026, the ECB increased its three key interest rates by 25 basis points, bringing the deposit facility, main refinancing operations and marginal lending facility rates to 2.50%, 2.65% and 2.90%, respectively. The ECB continued to emphasise a data-dependent approach in view of elevated uncertainty surrounding inflation and economic growth.

Financing conditions remained relatively tight. Bank lending rates for firms stood at 3.8% in July 2026, while the cost of market-based corporate debt was approximately 4.0%. At the same time, lending to firms continued to expand, with annual growth reaching 4.4% in July. Financial stability risks remained elevated, reflecting geopolitical uncertainty, stretched asset valuations and vulnerabilities associated with non-bank financial intermediation.

Overall, the macroeconomic environment during 9M 2026 can be characterised by resilient but moderate economic growth, elevated energy-driven inflation, a robust labour market and tighter financing conditions, against a background of continued geopolitical uncertainty.

Impact on Multitude Group:
The environment requires continued prudent credit risk and funding management, while resilient economic activity and labour markets continue to support demand for the Group's financing services.

Sector-specific environment – Consumer, SME, and Wholesale

Within this broader economy, the specific sectors of consumer banking, SME banking, and institutional finance (wholesale banking) experienced distinct trends:

1. Consumer banking environment:

Consumer conditions remained mixed during 9M 2026. The labour market continued to support household income, while consumer confidence recovered from the lows observed following the initial energy shock. Nevertheless, elevated energy prices and higher interest rates continued to constrain household purchasing power and borrowing conditions.

According to the ECB's July 2026 Bank Lending Survey, credit standards for consumer credit and other lending to households tightened further in Q2 2026, with a net 12% of banks reporting tighter standards. Demand for consumer credit decreased slightly, with a net decline of 2%, mainly reflecting lower consumer confidence, subdued expenditure on durable goods and the level of interest rates.

The regulatory environment also continued to develop. Member States were required to transpose Directive (EU) 2023/2225 on consumer credit by November 2025, with the new rules becoming applicable from 20 November 2026. The Directive broadens the scope of consumer credit regulation and strengthens requirements relating to consumer information and creditworthiness assessments.

Impact on Consumer Banking business unit:

Continued consumer financing needs provide opportunities for lending activity, while weaker credit demand, tighter market standards and the forthcoming application of the revised Consumer Credit Directive require disciplined underwriting and continued adaptation of lending processes.

2. SME banking environment:

European SMEs continued their recovery, although operating conditions remained challenging. The European Commission's Annual Report on European SMEs 2025/2026 expects that SME real value added increased by 2.5% and growth of SME employment by 1.0% in 2025 and projects further growth of 2.9% and 1.1%, respectively, in 2026. At the same time, persistent energy-price volatility, geopolitical tensions, higher tariffs and uneven access to finance continue to constrain investment capacity.

Financing conditions remained selective during 2026. In Q2, a net 7% of euro area banks reported tighter credit standards for loans to enterprises, mainly reflecting higher perceived economic risks and lower risk tolerance. Nevertheless, demand for corporate loans increased slightly, with a net 3% of banks reporting higher demand. Financing needs related to inventories and working capital, liquidity, refinancing and restructuring contributed positively to demand.

The combination of higher input and financing costs continues to place particular pressure on more vulnerable SMEs, although the overall SME sector is expected to remain an important contributor to European employment and value added. The Commission projects SMEs to account for approximately 65% of new employment and 57% of the increase in real value added in the EU economy in 2026.

Impact on SME Banking business unit:

Continued working-capital and liquidity requirements support demand for flexible SME financing, while elevated cost pressures and tighter credit conditions require selective origination and close monitoring of portfolio credit quality.

3. Institutional finance and wholesale banking environment:
Wholesale and institutional financing markets remained active but risk-sensitive during 9M 2026. Despite the fact that higher long-term interest rates and geopolitical uncertainty contributed to increased funding costs, corporate bond issuance nevertheless continued to grow, at an annual rate of 3.4% in July.

Financial markets remained vulnerable to abrupt repricing given elevated asset valuations, geopolitical risks and interconnectedness between banks and non-bank financial institutions. The ECB's May 2026 Financial Stability Review highlighted liquidity and leverage vulnerabilities in parts of the non-bank sector and the potential for market stress to be amplified through investment funds and private markets.

Private credit continued to develop as an alternative source of corporate financing. The FSB's Report on Vulnerabilities in Private Credit, issued in May 2026, estimated the global private credit market at approximately USD 1.5–2.0 trillion and noted increasing interconnections between private credit funds, banks, insurers and private equity firms. While private credit provides tailored financing and additional funding diversification, the FSB identified leverage, valuation opacity and interconnectedness as areas requiring continued monitoring.

Sustainable bonds also remain an established segment of capital markets. The latest OECD study reports USD 2.4 trillion of corporate sustainable bonds outstanding at the end of 2024, although these data represent structural market information rather than developments specific to 2026.

Impact on Wholesale Banking business unit:
The continued development of private and market-based financing supports demand for structured and secured financing solutions, while higher funding costs and elevated market uncertainty require disciplined pricing, collateral management and risk selection.

Outlook

Multitude Group expects continued profitable growth in 2026, with a net profit guidance of EUR 30.0 million, up from a range of EUR 24.0-26.0 million in 2025. Multitude publishes its guidance of financial results measured by net profit (profit after tax) for consolidated Group (capital market guidance). Additionally, the Group communicates other metrics and business targets that are of operational, indicative and supporting nature, i.e. not Capital Market Guidance metrics. For example, the Group communicates operational targets based on EBT (profit before income taxes) for each business unit.

During its Capital Markets Day in November 2025, the Group has provided visibility on its longer-term outlook, targeting net profit growth of 20% per annum in 2027 and 2028. This target is supported by the Group's platform-driven business model, the implementation of its three-pillar growth strategy, and a disciplined approach to cost efficiency and risk management. On group level, Multitude introduced additional operational targets. Multitude will aim to reach a Cost-to-Income Ratio of 40%, and a Return on Tangible Equity level of 20%+ by 2028. At the level of Multitude AG as a standalone legal entity, while no operational developments are expected in the traditional sense, the Company continues to play an instrumental role within the Group's structural and financial ecosystem.

Multitude AG is actively pursuing the Group's initiative to streamline its corporate structure by reducing the number of non-core subsidiaries, including through disposals and intra-group mergers.

In parallel, Multitude AG – through its branch – closely monitors and manages the funding requirements of its subsidiaries, as well as its own liquidity position. Given its responsibilities in providing funding and support, and acting as one of the issuers of the Group's bonds, any inability to fulfil

these obligations could adversely impact both Multitude AG's solvency and the financial position of the broader Group.

Multitude AG's role as the holding company – particularly in investment management, financing, and the employment of key personnel – remains essential to the execution of the Group's strategy and to its financial stability.

Consumer Banking expected development for 2026

At the Capital Markets Day in November 2025, the Group communicated a three-year target for Consumer Banking of 10% EBT growth (CAGR).

SME Banking expected development for 2026

The Group remains confident in the turnaround and long-term profitability potential of SME Banking. Based on the current outlook, 9M 2026 performance and the ongoing investment phase, positive EBT is expected latest 2027. The Group's guidance and long-term financial targets remain unchanged.

Wholesale Banking expected development for 2026

At the Capital Markets Day in November 2025, the Group outlined its 3-year target of 50% EBT growth (CAGR) for Wholesale Banking.

Assumptions and strategic enablers

The 2026 outlook is supported by several structural assumptions:

- All business initiatives should be net profit accretive within 24 months,
- Organisation structured for scalability and cost efficiency,
- Continuous enhancements in underwriting and risk management,
- Targeted investment in AI, automation, and customer experience.

All targets are based on the assumption of a stable operating environment and exclude the impact of extraordinary, non-recurring, or materially disruptive events. Leadership Team's focus remains on executing efficiently across core products, while selectively exploring inorganic opportunities.

Summary of financial targets

Group net profit

In 2025, the Group delivered a net profit of EUR 26.6 million, establishing a solid foundation for further growth. For 2026, the Group aims to enhance profitability with a target of EUR 30.0 million, reflecting a planned increase of 12.8%. This ambition underscores a strong commitment to sustained value creation and improved earnings performance at the consolidated level.

Overall assessment by the management

We believe that Multitude Group remains strongly positioned in the international FinTech landscape, thanks to its diversified portfolio across consumer lending, SME financing, and institutional financing and debt solutions, as well as its proven ability to innovate through technology and data. We expect a positive long-term trajectory in the Group's operating results, driven by our scalable digital platform and strategic focus on regulated, capital-efficient growth.

Our strategy aims to enhance automation, deepen customer engagement, and expand selectively across geographies and verticals. Over time, the Group aspires to become a leading European

embedded finance and lending infrastructure provider, delivering agile, efficient, and client-centric financial solutions across all its business units. On this basis, the Leadership Team anticipates a continued strong financial result from operating activities and, in line with prior years, a solid financial position. Overall, it will allow us to reach the anticipated EUR 30.0 million profit in 2026. This statement reflects the Leadership Team's assessment at the time of publication of this report.

Risks and opportunities

Risks report

The Group's activities expose the Group to various financial risks, including credit risk, market risks and liquidity risk. The Group aims to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance. Multitude takes moderate and calculated risks in conducting its business. The prudent management of risks minimises the probability of unexpected losses and threats to our reputation. Therefore, it can enhance profitability and shareholder value.

The Leadership Team monitors operations regularly and is responsible for adequate risk management. Each Leadership Team member bears responsibility for identifying and controlling the risks related to their functions in line with instructions from the Board of Directors of Multitude AG. The Board is ultimately responsible for, among other things, overseeing the Group's risk management through its Risk Committee. We frequently seek legal and regulatory advice and monitor changes internally that might occur in the countries we operate in and adjust operations where necessary.

1. Credit risk

Credit risk is the most critical risk for the Group's business, and accordingly, the Group carefully manages its exposure to this risk. Credit exposure arises principally through the Group's lending activities, together with the placement of liquidity with banks.

Geopolitical tensions in the Middle East and the resulting volatility in energy markets continued to weigh on the euro area economic outlook. The European Commission projected euro area real GDP growth of 0.9% for 2026, while the European Central Bank projected growth of 0.9%. Inflation remained elevated, reflecting the impact of higher energy prices on households and businesses. In response to persistent inflationary pressures, the ECB raised its key interest rates by 25 basis points as at its meeting on 10 September 2026 and maintained a data-dependent approach to future monetary policy decisions. Higher energy costs continued to erode real disposable income and consumer confidence, while also increasing operating costs for businesses and dampening investment activity. At the same time, national support measures across the European Union continued to mitigate part of the social and economic impact of elevated energy prices.

In view of the above, the Group continued to consider macroeconomic forecasting and modelling to assess how the different geographical portfolios are affected by current and projected economic developments. The model considers several parameters, including inflation, unemployment, GDP, trade index changes and economic sentiment amongst others.

Based on the assessments of the outcomes of the modelling process, Multitude continues to undertake strategic decisions to review lending parameters in certain markets where the model indicates unfavourable expectations. This process further assists the Group to manage its credit risk, and by also monitoring other key risk indicators such as customer payment behaviour in different territories, enables agile action where circumstances necessitate the tightening or loosening of underwriting scorecards accordingly.

Loans to customers

The Group's lending activities mainly comprise the granting of unsecured credit products with instalment repayment features, and revolving credit facilities to individual customers and SMEs in specific EU / EEA jurisdictions. The Group grants secured corporate loans via SME Banking and Wholesale Banking business units while consumer products are offered by Consumer Banking business unit. The Group historically offered unsecured short-term Micro Loans, with its exposure to this product having been substantially wound down by the end of 2025.

The Group applies a disciplined, data-driven underwriting framework across all jurisdictions, using credit policies, scorecards, and affordability assessments to determine lending decisions. New and repeat customers are evaluated through application and behaviour scorecards, which assign risk classes and define credit limits. These models are continuously monitored and updated by the Risk Management function to reflect market conditions, regulatory developments, and country-specific characteristics, ensuring a consistent and robust approach to credit origination.

Expected credit losses are assessed using a combination of collective and individual methodologies, depending on portfolio characteristics. Consumer Banking and unsecured SME exposures are measured on a collective basis due to their homogeneity, while secured corporate loans are evaluated individually, supported by ongoing monitoring of borrower performance, collateral values and covenant compliance. Wholesale Banking portfolios also incorporate a portfolio-level collective reserve that complements individual impairment assessments. The Group maintains a structured collection process, supported by jurisdiction-specific procedures and external agencies where appropriate, and may dispose of certain past-due exposures under predefined sale arrangements.

Despite growth in the loans to customers portfolio, the impaired loan coverage ratio decreased slightly by 1.3 percentage points, from 12.8% at year-end 2025 to 11.5% at the end of 9M 2026, reflecting the Group's strategy of maintaining a low-risk portfolio that delivers resilient returns.

Debt investments

The Group's debt investments comprise secured corporate bonds backed by loan portfolios, real estate and other pledged assets, supplemented by cash collateral. Credit quality is assessed at origination, with ongoing monitoring of covenant compliance and periodic evaluations of collateral values to determine expected credit losses. In addition to individual collateral assessments, the Group maintains portfolio-level collective reserves calibrated to asset class and risk characteristics, which complement the individually measured expected credit losses. Independent assurance reports may also be obtained under contractual rights to validate credit and financial information provided by issuers.

The Group's debt investments in securitisation portfolio consist of senior Class A notes issued by unregulated securitisation vehicles, backed by a portfolio of SME loans in Lithuania. These investments benefit from the higher credit quality and the highest payment ranking amongst other creditors. The Group conducts periodic assessments of the underlying portfolio and evaluates safeguards embedded in investment covenants to determine the appropriate level of expected credit losses.

The impaired debt investments coverage ratio stood at 2.5% at the end of 9M 2026 compared to 1.4% at the end of 2025. The low level of coverage is explained by the high collateral value and sound payment behaviour of obligors.

Cash and cash equivalents
The majority of the Group's cash is held with central banks, including the Central Bank of Malta, Sveriges Riksbank (Sweden), Czech National Bank, and the Lietuvos bankas (Lithuania). The remaining liquidity is maintained with various credit and financial institutions.

The Group uses external credit ratings issued by Standard & Poor's, Fitch and Moody's to assess the credit risk of individual counterparties, applying sovereign ratings to exposures with central banks. Credit risk on cash and cash equivalents held by Multitude Bank p.l.c. is further mitigated through treasury policy limits and compliance with the large-exposure requirements of the Capital Requirements Regulation (CRR).

Other financial assets
The Group includes loans to related parties, collateral receivables from banks and financial institutions, receivables from sold portfolios and receivables from non-lending activities in this line item. Receivables from sold portfolios include financial instruments that were originated and immediately sold, as well as delinquent loans sold via debt sale agreements. The Group uses external risk grades to reflect its assessment of the probability of default of individual counterparties, in the same way as for cash and cash equivalents.

2. Market risks

Market risks arise from open positions in the interest rate and monetary items in foreign currency. They are managed by the Group's Treasury function, in close cooperation with Financial Planning & Analysis (FP&A) team, which is also responsible for the Group's cash flow planning and ensuring the necessary liquidity level for all Group companies.

Foreign currency risk

As part of the treasury risk management policy, Group companies enter into foreign currency forward contracts to hedge material balances (including intercompany) that are not denominated in Euros. In accordance with the policy, the aim is to hedge close to 100% of the net exposures. The policy requires all Group companies to apply rules of natural hedging and optimally counterbalance significant foreign currency denominated transactions and balances.

As at 30 September 2026 and 31 December 2025, the Group's primary foreign currency transaction exposures arose from monetary assets and liabilities denominated in Danish krone (DKK), Swedish krona (SEK), Romanian leu (RON), Polish zloty (PLN), Norwegian krone (NOK) and Czech koruna (CZK). At 30 September 2026, these exposures also included US dollars (USD). The Group hedges the foreign exchange risk arising from its net monetary exposures in these currencies.

Interest rate risk

The Group is exposed to interest rate risk, which could impact its net interest income and the value of assets and liabilities through its business activities. The main items exposing the Group to the interest rate risk are loans to customers, debt investments, deposits from customers as well as issued debt securities. Currently, the Group is exposed to cash flow interest rate risk through its floating interest rate financial assets and liabilities, as well as pricing risk arising from the differences in refinancing periods between its fixed rate financial assets and liabilities. The interest rate risk is regularly measured, and the Group aims to apply natural hedging to minimise the exposure to interest fluctuations.

The Group analyses its interest rate exposures on a periodic basis. Various scenarios are simulated considering refinancing, renewal of existing positions and alternative financing. Based on these scenarios, the Group calculates the impact on profit and loss of a defined interest rate shift for

the assets and liabilities held by Multitude AG, Multitude Capital Oyj and Multitude Bank p.l.c. that constitute the majority of interest-bearing items with floating interest rates. The same interest rate shift is used for each simulation for all currencies. The scenarios are run for items that are subject to daily reference rates.

The Group keeps monitoring the materiality of interest rate risk derived from items recognised in the consolidated statement of financial position on a regular basis and aims to incorporate all significant changes of the business model into the assessment. The Group's floating and fixed rate interest-rate positions as at the end of the current reporting period, together with the comparative figures, are presented in the following table:

EUR '000	Floating interest rate	Fixed interest rate	Total
30 September 2026			
Loans to customers	383,013	552,752	935,765
Debt investments	95,248	155	95,403
Deposits from customers	(9,489)	(1,092,177)	(1,101,666)
Debt securities	(109,861)	(2,943)	(112,804)

EUR '000	Floating interest rate	Fixed interest rate	Total
31 December 2025			
Loans to customers	314,706	517,338	832,044
Debt investments	107,068	-	107,068
Deposits from customers	(3,819)	(1,030,640)	(1,034,459)
Debt securities	(105,384)	(2,969)	(108,353)

A sensitivity analysis in respect of interest rate changes is applied to all net floating-rate instruments to which the Group is exposed. This represents the net exposure arising after offsetting floating-rate assets (primarily loans to customers and debt investments) against floating-rate liabilities (mainly debt securities issued and customer deposits).

3. Liquidity risk

Liquidity risk is defined as the risk that the Group does not have sufficient liquid financial resources to meet obligations associated with financial liabilities settled by delivering cash or another financial asset. It arises from potential mismatches in the timing of cash flows under both normal and stressed conditions, which could affect the Group's ability to meet its payment obligations as they fall due. The objective of liquidity risk management is to maintain sufficient, readily available liquidity without compromising its value, thereby avoiding any uncertainty related to financial distress.

To mitigate these risks, the Group has diversified its funding sources beyond its core deposit base by issuing bonds and capital notes. In addition, it applies a liquidity-focused asset management approach, including monitoring of future cash flows at market level across each operating entity, with central oversight by the Group Treasury function. Group Treasury maintains rolling forecasts of liquidity requirements to ensure adequate cash reserves for operational needs and to preserve a sufficient buffer for debt facilities and other non-current liabilities, thereby avoiding breaches of contractual agreements. Forecasting incorporates debt financing plans, covenant compliance, internal balance sheet targets, regulatory requirements, and currency restrictions.

Group Treasury works closely with the Treasury function of Multitude Bank p.l.c. to ensure a coordinated and effective liquidity management framework across the organisation.

At the level of Multitude Bank p.l.c., liquidity risk is managed by the Bank's Treasury function and its Asset and Liability Committee (ALCO), which monitors day-to-day funding and liquidity ratios against internal and regulatory requirements. Key metrics include the Liquidity Coverage Ratio (LCR), Minimum Requirement for Own Funds and Eligible Liabilities (MREL), and Net Stable Funding Ratio (NSFR). The Bank continuously monitors asset growth, deposit development, and its overall liquidity position to ensure that all ratios remain comfortably above regulatory minimums.

Most of the Group's financial liabilities consist of customer deposits and issued bonds with defined contractual maturities. To maintain flexibility in liquidity planning, Multitude issues perpetual instruments with no maturity qualifying as IFRS equity. The overarching objective of liquidity risk management is to maintain an adequate level of liquid assets, taking into account expected cash outflows related to customer obligations and other liabilities.

During 9M 2026, no capital market debt instruments or other significant financial obligations fell due for repayment, apart from the voluntary redemption of the existing 2021 Multitude AG notes. This redemption was funded through proceeds from the successful placement of new capital notes.

Multitude expects its bond covenant metrics to remain comfortably above the required levels, particularly the net equity ratio as defined in the bond terms and conditions. As at the end of 9M 2026, the buffer amounted to 4.1 percentage points (18.0% required vs. 22.1% actual). This position is supported by the issuance of Tier 2 Notes at the level of Multitude Bank p.l.c. and subordinated perpetual floating rate callable capital notes at the level of Multitude Capital Oyj.

4. Operational risks

Legal, regulatory and data protection risks

Multitude employs over 700 people and provides services in 17 European countries. As a result, the Group is exposed to a range of legal and regulatory risks stemming from diverse legal systems, evolving legislation, and jurisdiction-specific compliance requirements. Given the concentration of its operations, Multitude prioritises compliance with the legal frameworks of Malta and Northern European countries.

The Group's Legal function manages regulatory, legal and litigation risks in close cooperation with the authorities in the respective countries and relevant stakeholders. This is further supported by a network of local external legal advisors, who provide jurisdiction-specific expertise and help ensure compliance with local laws and regulations.

Potential or foreseeable changes in applicable laws are analysed on an ongoing basis and any necessary modifications to the Group's operations are implemented proactively. Legal proceedings and potential claims are monitored and managed to reduce litigation exposure. Data protection risks are managed through robust cybersecurity frameworks, regular system audits, and continuous monitoring to prevent unauthorised access, data breaches, and service disruptions. The Group ensures compliance with General Data Protection Regulation (GDPR) and other applicable regulations under the oversight of the Legal function, with privacy-by-design principles embedded into all processes.

IT security risks

The Group's IT function established the framework for safeguarding all information systems, networks, and data assets against unauthorised access, misuse, and cyber threats. It defined clear roles and responsibilities for system users, administrators, and security personnel, ensuring accountability at all levels. The company policy mandates the use of strong authentication, encryption, access controls, and regular software updates across all systems. It includes procedures

for regular penetration testing, phishing simulations, incident detection, response, and recovery, supported by regular security awareness training for all employees.

As a provider of online lending, we have high dependence on IT infrastructure, therefore, we adopted a Business Continuity Plan on the level of Multitude Bank p.l.c. to ensure the highest possible reliability in delivering products and services. This is essential to maintaining the trust of customers and the market, as well as meeting contractual obligations. Interruptions to core processes and the unavailability of critical resources pose a significant risk to us and could have wider implications for the financial system. The plan is designed to ensure operational continuity in the event of an emergency and to reduce the risk of service disruptions.

Outsourcing and third-party risks

Multitude relies on third-party providers for certain critical functions such as IT infrastructure, data processing, and debt collection services. This creates exposure to risks related to service interruptions, regulatory non-compliance, data breaches, and substandard performance. To manage these risks, the Group's Procurement function, in cooperation with IT competence centre of the Group, conducts rigorous due diligence before onboarding vendors, establishes detailed contractual obligations including service-level agreements and collects data about third-party performance.

5. Specific risks in business units

Consumer Banking

The Consumer Banking business unit is primarily exposed to credit risk arising from unsecured lending to retail customers. The portfolio is characterised by short to mid-term maturities and a high volume of transactions, resulting in sensitivity to changes in customer repayment behaviour and the macroeconomic environment.

Credit risk is managed by the Group's Risk Management function, which oversees scoring models and credit policies. Portfolio performance and customer repayment behaviour are continuously monitored using proprietary risk management tools.

Liquidity risk arises from the need to support ongoing lending activities. This risk is managed at Group level through access to diversified funding sources, including customer deposits. The business unit is also exposed to foreign exchange risk due to its operations in multiple countries, but this is partially mitigated through natural hedging and foreign currency forward contracts. Interest rate risk is limited due to the predominantly short-term nature of the portfolio, allowing for frequent repricing of assets.

SME Banking

The SME Banking business unit is mainly exposed to credit risk from lending to small and medium-sized enterprises. Compared to Consumer Banking, exposures are larger and have longer maturities, leading to increased sensitivity to economic developments and potential concentration risks.

Credit risk is managed centrally by the Group's Risk Management function through defined credit policies, scoring models, and continuous monitoring of portfolio performance. Liquidity risk is relevant due to the funding requirements of the SME loan portfolio. Liquidity is managed centrally to ensure sufficient funding availability.

The business unit is exposed to foreign exchange risk to a limited extent due to its geographic footprint and manages this risk through hedging techniques like foreign currency forward contracts.

Interest rate risk arises from the maturity profile of the portfolio and may result in sensitivity to changes in market interest rates.

Wholesale Banking

The Wholesale Banking business unit is exposed to credit risk through its activities with institutional counterparties and debt investments. These exposures are primarily in the form of secured transactions, including bonds backed by loan portfolios, real estate or other pledged assets. Credit risk is mitigated through a high level of collateralisation and structural protections, including covenants such as advance rates, loan-to-value ratios and portfolio performance triggers. These covenants are monitored on a regular basis.

The business unit has limited foreign exchange risk, as its assets are predominantly denominated in EUR. Interest rate risk arises from the structure of the balance sheet, where assets are largely based on floating interest rates linked to Euribor, while funding is primarily based on shorter-term fixed-rate deposits. This results in sensitivity of net interest income to changes in market interest rates.

6. ESG risks

The Group recognises the importance of ESG risks and their potential impacts on business strategy, performance, and objectives. Oversight of risk management is provided at Board level by the Group Risk Committee, which covers all material risks. At the functional level, the Group's Risk Management function is responsible for the overall risk management framework and for monitoring the Group's risk profile.

Multitude Bank p.l.c. plays a central role within the Group, with the majority of the Group's income and assets associated with the Bank. Risk management within the Bank, is therefore subject to a dedicated governance. Multitude Bank p.l.c. operates under its own Risk Management Framework, overseen by the Bank's Risk Committee. This committee ensures that risk policies and controls meet regulatory requirements and best practices and advises the Board on the coordination and prioritisation of risk management matters. However, the Bank's Board oversees directly the management of ESG risks. The management of ESG risks at both the Group and Bank levels is a collaborative effort. The Chief Risk Officer (CRO) of Multitude Bank p.l.c. is supported by the ESG Function in identifying, assessing, and managing ESG risks.

Integration of ESG risks

ESG risks and impacts are integrated into the Group's overall risk management framework and are assessed over short-, medium-, and long-term horizons. This includes climate and environmental (C&E) risks, covering both physical and transition risks, as well as social and governance risks. The Group continues to enhance the integration of the ESG risks into the existing risk management processes to ensure a holistic approach and alignment with its overall risk management strategy.

During the financial year 2025, the ESG team conducted an ESG materiality assessment to evaluate how climate, environmental, social and governance factors may act as risk drivers across the three business units (Consumer Banking, SME Banking and Wholesale Banking) covering traditional risk categories including credit, market, liquidity, operational, reputational and business model risks.

The assessment identified relevant transmission channels through which these factors could influence risk exposure. Using a combination of quantitative and qualitative methods, the ESG team assessed the gross impact of ESG risk drivers and then considered the effectiveness of existing risk mitigation measures to determine residual materiality. No ESG risk driver was assessed as material. On its level, Multitude Bank p.l.c. manages ESG risks, including climate-related risks, through the following key processes:

Risk Appetite Statement – In the Risk Appetite Statement, the Board of Multitude Bank p.l.c. and its management formally establish a 'tone at the top' to be followed by the Bank's three lines of defence. The Bank expresses a low appetite for ESG risks, Human Rights risks and Climate Transition risks.

Underwriting Process – Multitude Bank p.l.c. includes an ESG risk assessment into the analysis of Wholesale Banking clients as part of the secured debt and loan origination process. The assessment covers environmental, social and governance matters. The assessment methodology is continuously enhanced to account for evolving best practices as well as for stakeholder and regulatory expectations.

Business Continuity Planning – ESG matters are included into the Bank's operational risk management through its Operational Risk Heatmaps, which evaluate the vulnerability of the Bank's critical processes for business continuity in the event of a natural disaster or public safety event.

Vendor Onboarding Process – The Group conducts an ESG assessment of any vendor arrangement with a total annual spend greater than EUR 50,000 or, if outsourcing, regardless of the value. This comprehensive evaluation includes screening for human rights and environmental incidents throughout the vendors' value chains. Furthermore, it involves a thorough evaluation of the counterparties' policies on the management of ESG issues, including human rights.

New Product Approval – ESG is an integral part of the Bank's New Product Approval Policy (NPAP) which follows European Banking Authority Guidelines on Internal Governance. Incorporating ESG considerations into the NPAP process ensures compliance with an appropriate risk approach and effective impact management regarding ESG issues during the early stages of new product development or market entry.

The integration of C&E risks into the risk management framework remains an ongoing focus. Multitude is committed to continuously enhancing its approach to ensure alignment with regulatory developments and emerging best practices.

For further information, we refer to our ESG report available under: https://www.multitude.com/investors/results-reports-and-publications/esg-reports.

Overall statement

The risk profile of Multitude Group has remained stable throughout 9M 2026. All known impacts of geopolitical and macroeconomic developments have been actively monitored and managed. No material changes in the Group's overall risk exposure have been identified. The Group's total risk across financial, operational, and ESG categories – remains adequately covered by available capital and liquidity buffers. Risk management and internal controls have been continuously strengthened during the period. As of the date of this report, no risks have been identified that would threaten the Group's continued existence or materially impact its financial position or performance.

Opportunities report

Opportunities are identified through the Group's strategic planning, risk management, and business unit forecasting processes. Where applicable, opportunities are assessed using internally developed models, including scenario planning, customer acquisition cost forecasts, product margin uplift estimates, and ESG scoring tools. Quantitative estimates support strategic decision-making, particularly in relation to capital allocation and technology investments.

While no binding financial forecasts are made in this report, the Group provides directional impacts and indicative sizing where internal control processes rely on such quantifications.

Strategic opportunities

Business model scalability

The Group operates a modular FinTech growth platform comprising Consumer Banking (Ferratum), SME Banking (CapitalBox), and Wholesale Banking (Multitude Bank), enabling focused growth initiatives and disciplined capital allocation across profitable verticals. The platform supports scalable and capital-efficient expansion, allowing new products, markets, and partnerships to be added without linear increases in cost. Shared infrastructure enables cross-unit monetisation, partnership-led distribution, and reuse of data, risk, and payment capabilities. As volumes scale, data and AI-driven models benefit from compounding effects, supporting improved pricing accuracy and risk performance, and contributing to diversified revenue growth and improved returns on capital.

Revenue Diversification

The continued expansion of recurring fee income, particularly from partnerships, servicing activities, payment services and Sortter, provides an opportunity to further diversify the Group's revenue base and reduce reliance on interest income. Additional opportunities may emerge from further broadening the Group's mix of fee-generating activities and the continued development of the Group's platform and ecosystem.

Operational Leverage

The Group expects degressive cost development as it scales, enabling revenue growth to translate into improved profitability.

Scalable Funding to Support Portfolio Expansion

The Group benefits from a diversified funding structure, with deposits representing the largest component supplemented by placement of capital notes, providing a stable and scalable foundation for growth. This supports the expansion of loan portfolios, organic growth initiatives, and selective M&A opportunities, while maintaining funding flexibility and cost efficiency.

Geographic Expansion

The platform model enables expansion into additional markets and customer segments without significant incremental cost.

Business Unit Development

Across all business units, Multitude sees opportunities in further scaling its diversified platform while strengthening earnings quality. In Consumer Banking (Ferratum), opportunities include renewed portfolio growth following the repositioning of the product mix toward longer-term customer products, the expansion of partnerships, and a growing contribution from fee income complementing interest income.

The acquisition of Sortter Oy further supports Consumer Banking through additional fee-based revenue opportunities. SME Banking (CapitalBox) offers potential through portfolio growth, increasing automation, improved risk-based pricing and continued optimisation of its product mix, supporting the transition toward profitability. Wholesale Banking continues to benefit from scaling secured lending and payment services, where increasing payment volumes can be supported at low incremental cost. Together, these developments support degressive cost development and gradual improvements in profitability as the platform scales.

Technological and Digital Opportunities

Cybersecurity as a Differentiator

A culture of cybersecurity awareness supports operational resilience and strengthens positioning in regulated markets. The requirements of DORA (Digital Operations Resilience Act) are considered within the Group's cybersecurity framework.

AI, Data and Automation

The Group is expanding the use of AI, machine learning and automation across all business functions. AI agents and data-driven tools can support faster customer service, more efficient operations and better-informed decisions, including in underwriting, pricing and credit management. Their use can help the Group scale while strengthening risk assessment and control. Multitude continues to refine these capabilities with appropriate governance and human oversight.

Summary of Opportunities

In 9M 2026, Multitude Group's opportunities centred on scaling its modular FinTech platform across all business units and acquisition of new business, supporting efficient growth, diversification, and improved capital utilisation.

Changes in opportunity landscape since 2025

Compared to the prior year, the Group has made progress in executing its strategic priorities, with several initiatives advancing from development to implementation:

- Further progress in scaling Wholesale Banking,
- Continued development of revenue diversification, including recurring income streams,
- Expansion of partnership-driven growth across business units,
- Advancement of technology initiatives, including AI, into operational use,
- Completion of the Sortter Oy acquisition.

These developments reflect a continued focus on execution and scaling of the Group's strategy.

Summary of risks and opportunities

Multitude AG entered 2026 with a stable risk profile, supported by strong governance and a multi-dimensional risk management system. At the same time, opportunities may arise from the further scaling of the Group's modular FinTech platform, the continued diversification of revenue streams, and the ongoing development of operational efficiency through automation and cost discipline. Additional opportunities may result from the further development of Wholesale Banking, the expansion of partnership-based business models, and the increasing share of recurring fee income through the new acquisition. All opportunity statements are subject to uncertainty and do not constitute financial forecasts.

About this report

This Interim Management report has been prepared in accordance with the applicable provisions of the German Securities Trading Act (Wertpapierhandelsgesetz – WpHG), in particular § 115 WpHG, which governs the preparation and disclosure of interim financial reports by issuers whose securities are admitted to trading on a regulated market.

Notes to condensed consolidated interim financial statements

1. General information

In this report, "Multitude," "the Group," "company," and "we" are used interchangeably. Multitude is a listed European FinTech company offering digital lending and online banking services to consumers, small and medium-sized enterprises (SMEs), as well as secured debt and payment solutions for mid-sized to larger corporations, and other FinTechs. Our business model caters to customer groups that are not considered by other market participants. This gives us a strategic advantage and opens up access to financial services for these customer groups. We provide services through three business units supported by our growth platform. The parent company, Multitude AG (registration number CHE-445.352.012), was established in 2005. It is registered in Switzerland at Grafenauweg 8, 6300 Zug, Switzerland.

Multitude AG is listed on the Prime Standard of the Frankfurt Stock Exchange with a ticker symbol "MULT". The Group includes Multitude Bank p.l.c., licensed by the Malta Financial Services Authority (MFSA), which is a significant Group company, and allows it to provide financial services and products to the European Economic Area.

1.1 Significant changes in the current reporting period

Placing of EUR 70.0 million Perpetual Capital Notes

In March 2026, Multitude Capital Oyj successfully placed EUR 70.0 million subordinated perpetual floating rate callable capital notes (ISIN: NO0013726893) qualifying as IFRS equity (Note 16). In connection with this issuance, holders of the existing 2021 Multitude AG perpetual notes (ISIN: NO0011037327) were offered the option either to exchange their holdings for the 2026 perpetual notes or to settle them in cash under a tender offer.

Acquisition of Sortter Oy

On 20 May 2026, Multitude signed an agreement to acquire full ownership of Sortter Oy ("Sortter"), a leading Finnish financial services comparison platform, after an initial investment of a 19.97% stake in Sortter in 2023 (Note 3.3).

Redemption of 2021 Multitude AG perpetual notes

On 5 July 2026, Multitude AG completed the full redemption of its outstanding subordinated perpetual floating rate callable capital notes (ISIN: NO0011037327). Details of this transaction are disclosed in Note 16.

2. Summary of material accounting policies

2.1 Basis of preparation

This condensed consolidated interim financial report for the nine-month reporting period ended 30 September 2026 has been prepared in accordance with IAS 34 Interim Financial Reporting. The interim report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the consolidated financial statements for the year ended 31 December 2025 and any public announcements made by Multitude during the interim reporting period.

The condensed consolidated interim financial statements have been prepared on a historical cost basis, except for derivative financial instruments and contingent consideration which are measured at fair value through profit or loss (FVPL). The condensed consolidated interim financial statements are presented in thousand Euros ("EUR 000"). Figures in the financial statements, including subtotals and totals, may not sum precisely due to rounding. Multitude has applied similar accounting judgements, estimates, and assumptions for this interim report as those included in the latest annual report. The Group has prepared its condensed consolidated interim financial statements on the basis that it will continue to operate as a going concern.

2.2 Statement of compliance

The condensed consolidated interim financial statements of the Group have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB) and adopted by the European Union. IFRS Accounting Standards comprise the following authoritative literature: IFRS Accounting Standards, IAS® Standards, Interpretations developed by the IFRS Interpretations Committee (IFRIC® Interpretations) or its predecessor body, the Standing Interpretations Committee (SIC® Interpretations).

2.3 Presentation of financial statements

The Group presents its consolidated statement of financial position in order of liquidity based on Multitude's intention and perceived ability to recover / settle the majority of assets / liabilities of the corresponding financial statement line item. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 12.

2.4 New standards, interpretations and amendments

This Note provides a summary of (a) new standards and amendments that are effective for the first time for periods commencing on or after 1 January 2026 (i.e. year ending 31 December 2026), (b) IFRS Interpretations Committee agenda decisions issued in 2026 and (c) forthcoming requirements, being standards and amendments that will become effective on or after 1 January 2027.

(a) New standards and amendments – applicable 1 January 2026. The following amendments and improvements apply for the first time to financial reporting periods commencing on or after 1 January 2026:

Title	Key requirements if relevant
Amendments to IFRS 9 and IFRS 7 - Contracts Referencing Nature-dependent Electricity	Not relevant. Multitude does not have contracts referencing nature-dependent electricity.
Amendments to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments	1. Derecognition of Financial Liabilities (IFRS 9) Electronic Transfers: Relevant. Allows entities to derecognise a financial liability settled through electronic payment systems before the settlement date if certain specific criteria are met. The option must be applied consistently to all such transactions. This option was not applied by the Group. 2. Classification of Financial Assets (IFRS 9) Basic Lending Arrangement: Relevant. Provides guidance on assessing whether contractual cash flows align with a basic lending arrangement, with added examples for clarity. Non-Recourse Features: Relevant. Clarifies that a financial asset has non-recourse features if cash flows are limited to those generated by specific assets. Contractually Linked Instruments: Not relevant. Multitude does not have these instruments. 3. Disclosure Requirements (IFRS 7) Equity Investments at Fair Value. Not relevant because Multitude does not have equity instruments held at fair value through other comprehensive income. Contingent Contractual Terms: Relevant. Mandates disclosure of contractual terms that could alter cash flows based on contingent events, covering financial assets at amortised cost or fair value through other comprehensive income and financial liabilities at amortised cost.
Annual Improvements to IFRS Accounting Standards — Volume 11	Relevant. Annual Improvements to IFRS Accounting Standards — Volume 11 introduces narrow-scope amendments intended to clarify wording, correct minor inconsistencies, and remove outdated references across several IFRS Accounting Standards. While the amendments do not introduce new accounting policies, they improve consistency and application in practice. For Multitude, the most relevant impacts relate to IFRS 7 and IFRS 9, where clarifications on derecognition, transaction price references, and disclosure guidance may affect financial instruments disclosures and documentation, given the Group's lending and financing activities. Amendments to IAS 7 improve clarity in cash flow presentation terminology, supporting consistent reporting across entities. Changes to IFRS 10 refine judgement around de facto agents, which may be relevant for assessing control in structured arrangements or partnerships. Overall, the amendments enhance clarity and comparability without materially affecting recognition or measurement.

(b) IFRS Interpretations Committee agenda decisions issued in 2026, the following agenda decisions were issued that might be relevant for the preparation of reports in 2026. The date issued refers to the date of approval by the IASB as per the IASB's website.

Date issued	Topic
2 February 2026	Embedded Prepayment Option (IFRS 9)
2 February 2026	Determining and Accounting for Transaction Costs (IFRS 9)

(c) Forthcoming requirements. The following standards and amendments had been issued but were not mandatory for annual reporting periods ending on 31 December 2026.

Title	Key requirements if relevant	Effective Date
IFRS 18 Presentation and Disclosure in Financial Statements	Relevant. IFRS 18 introduces mandatory subtotals, such as "operating profit," to improve clarity in financial performance reporting. It requires classification of income and expenses into specific categories like operating, investing, and financing. Management-defined performance measures (MPMs) must be clearly labelled, reconciled with IFRS measures, and explained for their usefulness. Comparative information for all reported amounts must be provided, with explanations for any changes. The standard emphasises proper aggregation and disaggregation to ensure meaningful and clear financial statements. Finally, IFRS 18 will replace IAS 1 while retaining its key principles. The IFRS 18 is expected to have a material impact on the future financial statements of the Group, introducing significant changes to the presentation and disclosure of income and other financial elements within the primary statements.	1 January 2027
IFRS 19 Subsidiaries without Public Accountability: Disclosures and its amendments	Not relevant. Multitude, as a group of companies that prepares a comprehensive set of consolidated financial statements, is not impacted by the changes in IFRS 19, as it is not a subsidiary of another entity.	1 January 2027
Amendments to IAS 21 – Translation to a Hyperinflationary Presentation Currency	Not relevant. The amendments are not applicable to Multitude because the Group neither: • has a functional currency of a non-hyperinflationary economy and translating its results and financial position into the currency of a hyperinflationary economy; nor • translates the results and financial position of a foreign operation into the currency of a hyperinflationary economy.	1 January 2027
Amendments to IAS 28 - Amendments to the Fair Value Option for Investments in Associates and Joint Ventures	Not relevant. Multitude's investment in associate is accounted for using equity method.	1 January 2027
IFRS 20 Regulatory Assets and Regulatory Liabilities	Not relevant. The Group is not subject to a regulatory agreement that creates regulatory assets and regulatory liabilities.	1 January 2029

The Group is actively working on assessing and implementing all forthcoming IFRS Accounting Standards (specifically IFRS 18 that will have significant impact on presentation of financial statements). We are conducting detailed analyses to evaluate the implications of these standards on our financial reporting processes and developing comprehensive implementation plans.

The Group remains committed to ensuring full compliance with all applicable IFRS requirements by the respective effective dates and will continue to monitor guidance and updates to be fully prepared for their adoption.

3. Group companies

3.1 Organisational structure of the Group

The consolidated financial statements include the parent company and all subsidiaries over which the parent company directly or indirectly has control, typically through holding a majority of voting rights. As at the end of 9M 2026, the scope of consolidation comprised 17 subsidiaries, with the addition of Sortter Oy (See Note 3.3). Major subsidiaries include Multitude Bank p.l.c., Multitude IT Labs s.r.o., CapitalBox AB, and Vector Procurement Solutions Inc., all of which are wholly owned. A full list of subsidiaries is provided in the consolidated financial statements for 2025.

During 2025, the Group initiated the consolidation of lending-related activities under Multitude Bank p.l.c. and commenced the simplification of the Group's legal entity structure by reducing the number of non-core subsidiaries. For the list of subsidiaries disposed of during 2025, please refer to the 2025 consolidated financial statements. The aggregate financial information related to these transactions at the date of disposal is presented in the following table for the comparative periods:

EUR '000	Q3 2025	9M 2025
Consideration received or receivable:		
Cash	1,962	5,030
Fair value of contingent consideration	1,736	11,587
Total disposal consideration	**3,698**	**16,617**
Carrying amount of net assets sold	(1,667)	(14,776)
Net gain on disposal before reclassification of foreign currency translation reserve	2,031	1,841
Reclassification of foreign currency translation reserve to profit or loss on disposal of subsidiaries	(4)	407
Net gain on disposal of subsidiaries	**2,027**	**2,248**

None of the disposals met the criteria for classification as discontinued operations under IFRS 5. In relation to the disposal of subsidiaries in 2025, the Group received contingent consideration of EUR 11.1 million during 9M 2026 (9M 2025: EUR 0.2 million). There were no disposals of subsidiaries during 9M 2026.

There were no material related party transactions during the reporting period other than the following:

(a) the acquisition of the remaining equity interest in Sortter Oy, which the Group had previously accounted for as an associate using the equity method;
(b) dividends received from Lea Bank AB; and
(c) the repayment of a loan by a former member of Leadership Team amounting to EUR 378.7 thousand, comprising principal of EUR 347.9 thousand and interest of EUR 30.8 thousand.

For the comparative period, transactions concerning investment in Lea Bank AB were the only material transactions with related parties.

3.2 Investments in associates

As at 30 September 2026 and 31 December 2025, the Group held 28,489,175 shares in Lea Bank AB, a digital niche bank domiciled in Sweden, representing a 29.44% stake (31 December 2025: 29.68%). The Group did not enter into any share transactions during 9M 2026. The marginal decrease in its ownership interest was attributable to changes in the associate's total number of outstanding shares. During 9M 2025, the Group increased its stake by 19.57 percentage points to 29.47% as at 30 September 2025. This investment is classified as an investment in associate and is accounted for using the equity method.

At the Annual General Meeting of Lea Bank AB held on 12 May 2026, it was resolved that an ordinary dividend of SEK 0.72 per share would be paid to its shareholders. Accordingly, Multitude was entitled to receive a gross amount of SEK 20.5 million (EUR 1.9 million).

The transactions with Lea Bank AB were as follows during 9M 2026 and for the year ended 31 December 2025:

EUR '000	30 September 2026	31 December 2025
Beginning of the period	28,103	8,432
Additions	-	19,748
Share of results	2,627	2,689
Share of other comprehensive loss	(117)	-
Dividends declared	(1,883)	(3,958)
Exchange differences on translation of foreign operations	(1,288)	1,192
End of the period	**27,442**	**28,103**

3.3 Business combination

On 20 May 2026, the Group acquired the remaining 80.03% of the shares and voting rights in Sortter Oy. As a result, Sortter became a wholly owned subsidiary.

The identifiable assets acquired and liabilities assumed at the acquisition date included inputs comprising the technology platform, trademarks, and customer relationships. The acquired processes included loan comparison and matching, loan application handling, and the operation and development of the platform. The Group determined that the acquired inputs and substantive processes together significantly contribute to the ability to generate revenue. Accordingly, the Group concluded that the acquired set of activities and assets constitutes a business in accordance with IFRS 3.

Acquiring all shares of Sortter supports the Group's ambition to expand its revenue streams. Given Multitude's strong understanding of Sortter's business model and the markets it serves, the investment is strategically aligned opportunity to support Sortter's further growth while adding an incremental fee income stream for Multitude, in line with the Group's revenue diversification strategy.

From the date of acquisition, Sortter Oy contributed EUR 10.0 million of revenue and EUR 1.4 million to profit of the Group, excluding the EUR 2.5 million gain arising from the remeasurement of the Group's previously held equity interest in Sortter Oy to fair value. If the acquisition had occurred on 1 January 2026, consolidated pro-forma revenue and profit of the Group for the 9M 2026 would have been EUR 206.7 million and EUR 23.3 million, respectively. These amounts have been calculated using the subsidiary's results and adjusting them to:

- align the accounting policies of Sortter Oy to the Group's accounting policies, and
- record the additional amortisation on the intangible assets, including tax impact, that would have been incurred as if the acquisition had taken place on 1 January 2026.

In determining these amounts, management has assumed that the fair value adjustments, determined provisionally, that arose on the date of acquisition, would have been the same if the acquisition had occurred on 1 January 2026.

The consideration transferred at the acquisition date consisted of cash amounting to EUR 7.0 million.

At the acquisition date, the Group recognised the identifiable assets acquired and the liabilities assumed in the business combination:

	EUR '000
Cash and cash equivalents	3,546
Other financial assets	2,323
Prepaid expenses and other assets	6
Intangible assets	7,975
Property and equipment	2
Other financial liabilities	(8,965)
Other liabilities	(951)
Deferred tax liabilities	(471)
Total identifiable net assets acquired	**3,465**

The other financial assets comprise gross contractual amounts due from customers of EUR 2.3 million, which were expected to be collectible as at the acquisition date.

Goodwill arising from the acquisition has been recognised as follows:

	EUR '000
Consideration transferred	7,003
Fair value of pre-existing equity interest	3,953
Fair value of identifiable net assets acquired	(3,465)
Goodwill	**7,491**

The remeasurement to fair value of the Group's existing 19.97% interest in Sortter resulted in a gain of EUR 2.5 million (EUR 3.9 million less the EUR 1.4 million carrying amount of the equity-accounted investment at the acquisition date). The gain is included in other income (Note 8) and is excluded from Sortter Oy's post-acquisition contribution to the Group's profit or loss.

The fair value of the Group's pre-exisiting equity interests and Sortter's intangible assets (technology platform, trademarks, and customer relationships) has been measured provisionally, pending completion of independent valuation.

The goodwill arising from the acquisition is primarily attributable to the skills and technical expertise of Sortter's workforce, as well as expected synergies from the strategic alignment of Sortter with the Group's Growth Platform strategy. None of the goodwill recognised is expected to be deductible for tax purposes. Goodwill is allocated entirely to the Consumer Banking business unit.

The acquisition of Sortter resulted in the elimination of a previously issued corporate loan of EUR 8.0 million, together with accrued interest, which had been classified as loans to related parties in the consolidated statement of financial position (Note 15). The related ECL provision of EUR 0.2 million was derecognised from the consolidated statement of financial position. This corporate loan, together with accrued interest, formed part of other financial liabilities assumed at the acquisition date.

The details of the cash flows from the acquisition of Sortter, presented under investing activities in the consolidated statement of cash flows, are shown below:

	EUR '000
Cash consideration paid	(7,003)
Cash and cash equivalents acquired as at the date of acquisition	3,546
Acquisition of subsidiary, net of cash acquired	**(3,457)**

4. Segment information

Multitude has three business units, Consumer Banking (under Ferratum brand), SME Banking (under CapitalBox brand) and Wholesale Banking (under Multitude Bank brand), which are considered operating and reportable segments within the definition described in IFRS 8. Multitude Bank p.l.c. is the regulatory service provider for each business unit within the Group. The Chief Operating Decision Maker (CODM) is defined as the Group CEO supported by business unit CEOs. The measurement principles and allocation between business units follow the information provided to the CODM as required by IFRS 8.

The CODM monitors the operating results of the business units for the purpose of making decisions about resource allocation and performance assessment. The performance of the business units is evaluated using various key indicators and is consistently reconciled with the profit before income taxes stated in the consolidated financial statements. Profit before income taxes serves as the primary measure of the profitability of these business units.

Consumer Banking

Consumer Banking offers digital loans for individuals' daily needs, such as unplanned, short-term financing needs resulting from unexpected life events. By the end of 9M 2026, it offered three product categories: Instalment Loans (including Plus Loan and Prime Loan), Credit Limit, and Credit Card. The business unit's operations spanned across 13 European markets: Bulgaria, Croatia, Czechia, Denmark, Estonia, Finland, Germany, Latvia, Norway, Poland, Romania, Slovenia and Sweden.

The acquisition of Sortter Oy added a significant new service offering to the Group's operations by enabling the comparison of consumer loan products and the introduction of consumer loan applicants to a network of lenders in Finland.

SME Banking

SME Banking provides financing solutions to small and medium-sized enterprises (SMEs). By the end of 9M 2026, it had established five distinct products: Instalment Loan, Invoice Purchasing, Credit Line, Secured Loan, and Purchase Finance (BNPL). It operates in five markets: Finland, Sweden, Denmark, Lithuania, and the Netherlands.

Wholesale Banking

Wholesale Banking is the business unit operating within Multitude Bank p.l.c.'s own infrastructure. It focuses on delivering customer value through two core offerings: Secured Debt and Payment Solutions. Wholesale Banking addresses more complex financing needs where agility and bespoke structuring set it apart. Within Wholesale Banking, the core focus lies in the origination and structuring of Secured Debt facilities from EUR 5.0 million and upward for portfolio financing of technology-enabled non-bank lenders and, respectively, a typical minimum debt facility volume of EUR 1.0 million for real-asset lending. Payment Solutions offer institutional clients a seamless and secure infrastructure for transaction processing and financial operations.

The results of operations from the Group's operating and reportable segments for the current period 9M 2026 and comparable period 9M 2025 are shown in the following tables.

Operating and reportable segments for Q3 2026

EUR '000	Consumer Banking	SME Banking	Wholesale Banking	Total
Interest income	41,981	8,978	7,416	58,375

5. Interest income and expense

Interest income is the primary income from the Group's operations, and hence it is disaggregated into categories for analysis purposes based on the asset types.

Interest income

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Interest income on loans to customers	54,341	160,235	54,101*	174,100*
Interest income on debt investments	2,565	8,008	3,482	9,912
Interest income on bank deposits	1,119	3,641	687	1,877
Interest income on other financial assets	350	775	248*	675*
Total interest income	**58,375**	**172,659**	**58,518**	**186,564**

*Reclassifications have been made to conform to the presentation applied in consolidated financial statements for the year ended 31 December 2025 without changes on the consolidated statement of profit or loss.

The Group analyses interest income by asset type and geographic market, representing how economic factors impact nature, amount, timing, uncertainty, and cash flows of the above income streams. Interest income is displayed by geographic region for the current and comparative periods, as follows:

Interest income by geographic market

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Country of domicile - Switzerland	148	444	162	232
Northern Europe	28,725	87,597	29,628	88,854
Eastern Europe	25,214	69,605	22,228	66,838
Western Europe	4,136	14,445	6,197	29,851
Other	152	568	303	789
Total interest income	**58,375**	**172,659**	**58,518**	**186,564**

A breakdown of interest expense by type for the current reporting period and comparative period is presented in the table below.

Interest expense

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Interest expense on deposits from customers	(8,125)	(25,384)	(8,435)	(24,424)
Interest expense on debt securities	(3,121)	(9,042)	(2,978)	(8,062)
Interest expense on lease liabilities	(85)	(260)	(151)	(361)
Interest expense on other financial liabilities	(71)	(284)	(39)	(480)
Total interest expense	**(11,402)**	**(34,970)**	**(11,603)**	**(33,327)**

6. Fee and commission income and expense

Fee and commission income

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Brokerage fee income	8,204	14,134	1,595	5,279
Loan servicing fee income	2,719	8,104	1,799	2,390
Other fee and commission income	949	2,248	570	1,640
Total fee and commission income	**11,872**	**24,486**	**3,964**	**9,309**

There are no contract assets and liabilities relating to fee and commission income as at 30 September 2026 and 31 December 2025. There are no significant payment terms concerning fee and commission income and no discounting to present value is applied. Following the disposal of certain Group companies in 2025, Multitude began providing loan servicing to third party owner and generating fee income from non-lending activities. In the first 9M of 2026, the acquisition of Sortter Oy further diversified the Group's fee and commission income through additional brokerage fee income (See Note 3.3).

The Group analyses fee income by type and geographic market, representing how economic factors impact nature, amount, timing, uncertainty, and cash flows of the above income streams. Fee income is displayed by geographic region for the current and comparative periods, as follows:

Fee and commission income by geographic market

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Country of domicile - Switzerland	-	-	-	-
Northern Europe	7,176	10,244	81	91
Eastern Europe	3,037	12,577	2,673	6,946
Western Europe	1,659	1,665	1,210	2,272
Total fee and commission income	**11,872**	**24,486**	**3,964**	**9,309**

Fee and commission expense

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Brokerage fee expense	(1,243)	(2,182)	(463)	(1,356)
Total fee and commission expense	**(1,243)**	**(2,182)**	**(463)**	**(1,356)**

Brokerage fee expense represents incremental direct cost of services provided in determination of net fee and commission income.

7. Fair value and foreign exchange gains and losses (net)

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Gain on revaluation of contingent consideration	1,735	5,439	-	-
Unrealised gain / (loss) on derivative financial assets and liabilities	918	2,006	(28)	295
Unrealised foreign exchange gain / (loss)	192	58	(396)	(392)
Loss on revaluation of contingent consideration	-	(1,500)	-	(68)
Realised foreign exchange (loss)	(314)	(508)	(245)	(793)
Realised (loss) on derivative financial assets and liabilities	(1,396)	(3,552)	(567)	(1,802)
Total fair value and foreign exchange gains and losses (net)	**1,135**	**1,943**	**(1,236)**	**(2,760)**

Most of the foreign exchange impact on the consolidated statement of profit and loss is generated by Swedish Krona monetary items on the statement of financial position of Group companies. The impact was mitigated by foreign exchange forward contracts, recognised as derivative financial instruments, and by an increase in customer deposits in Sweden, which provided a natural hedge.

As part of the consideration for the 2025 divestments, the Group is entitled to contingent consideration which is remeasured at its fair value at each reporting date (Note 15).

8. Other income and expense

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
OTHER INCOME:				
Gain from cancellation of lease	6	6	62	64
Gain from disposal of property and equipment	2	4	1	9
Remeasurement to fair value of pre-existing equity interests in an acquiree	-	2,504	-	-
Gain from disposal of subsidiaries	-	-	2,027	2,390
Other income	3	139	-	-
Total other income	**11**	**2,653**	**2,090**	**2,463**
OTHER EXPENSE:				
Loss on disposal of intangible assets	-	(3)	(73)	(73)
Loss on cancellation of lease	-	-	-	(8)
Loss on disposal of property and equipment	-	-	(1)	(4)
Loss on disposal of subsidiaries	-	-	-	(142)
Other expense	(1)	(7)	-	-
Total other expense	**(1)**	**(10)**	**(74)**	**(227)**

The remeasurement to fair value of the Group's existing 19.97% interest in Sortter resulted in a gain of EUR 2.5 million, which is presented under other income. Details of the acquisition of Sortter are disclosed in Note 3.3.

9. Operating expenses

The Group presents an analysis of the operating expenses by their nature for the current and the comparative periods in the table below:

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Impairment loss on loans to customers	(16,229)	(51,163)	(19,049)	(61,479)
General and administrative expense	(11,874)	(31,940)	(9,631)	(28,615)
Personnel expense	(8,903)	(30,031)	(9,772)	(29,612)
Selling and marketing expense	(7,611)	(16,605)	(3,247)	(9,701)
Depreciation and amortisation	(4,253)	(11,898)	(3,463)	(9,945)
Total operating expenses	**(48,870)**	**(141,637)**	**(45,162)**	**(139,352)**

Impairment loss on loans to customers includes EUR 3.4 million of invoicing and collection costs in 9M 2026 (9M 2025: EUR 3.4 million). Personnel expense includes share-based payment expense for EUR 0.2 million in 9M 2026 (9M 2025: EUR 0.7 million). General and administrative expense includes EUR 1.3 million of depositor compensation scheme contributions in 9M 2026 (9M 2025: EUR 2.1 million).

The acquisition of Sortter was the main driver of the increase in general and administrative expenses, selling and marketing expenses, and depreciation and amortisation during the reporting period. Personnel expenses remained stable compared with the comparative period, as the impact of lower overall headcount offset other changes.

10. Income tax expense

EUR '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Current income tax expense	(492)	(1,879)	(206)	(1,786)
Deferred tax expense	(1,088)	(1,725)	(720)	(1,256)
Total income tax expense	**(1,580)**	**(3,604)**	**(926)**	**(3,042)**

Income tax expense is recognised based on estimate of the weighted average effective annual income tax rate expected for the full financial year. The estimated average annual tax rate for the period ending 30 September 2026 was 13.9% (30 September 2025: 13.1%).

11. Earnings per share

The calculation of earnings per share attributable to the owners of the parent company includes an adjustment for distributions related to perpetual bonds less tax benefit arising from the classification of perpetual bonds as a liability under Finnish tax regulations. The calculation of basic earnings per share is shown in the table below:

	Q3 2026	9M 2026	Q3 2025	9M 2025
Profit for the period attributable to owners of the parent company (EUR '000)	9,230	22,319	6,090	20,246
Distributions on perpetual bonds recognised directly in retained earnings, net of tax (EUR '000)	(1,848)	(5,346)	(693)	(2,806)
Profit for the period attributable to owners of the parent company, after distributions on perpetual bonds (EUR '000)	7,382	16,973	5,397	17,440
Weighted average number of ordinary shares in issue (N '000)	21,412	21,412	21,411	21,433
Basic earnings per share attributable to the ordinary equity holders, EUR	**0.34**	**0.79**	**0.25**	**0.81**

Calculation of diluted earnings per share is shown in the table below:

	Q3 2026	9M 2026	Q3 2025	9M 2025
Profit for the period attributable to owners of the parent company (EUR '000)	9,230	22,319	6,090	20,246
Distributions on perpetual bonds recognised directly in retained earnings, net of tax (EUR '000)	(1,848)	(5,346)	(693)	(2,806)
Profit for the period attributable to owners of the parent company, after distributions on perpetual bonds (EUR '000)	7,382	16,973	5,397	17,440
Weighted average number of ordinary shares and potential ordinary shares in issue (N '000)	22,525	22,533	22,429	22,421
Diluted earnings per share attributable to the ordinary equity holders, EUR	**0.33**	**0.75**	**0.24**	**0.78**

Distributions on perpetual bonds recognised directly in retained earnings include perpetual bonds interests, redemption premium and amortisation of original issue discount and transaction costs.

Calculation of weighted average number of ordinary shares and potential ordinary shares used in determination of basic and diluted earnings per share is shown in the table below:

N '000	Q3 2026	9M 2026	Q3 2025	9M 2025
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share	21,412	21,412	21,411	21,433
Adjustments for calculation of diluted earnings per share:				
Matching share plans	1,113	1,121	1,018	988
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted earnings per share	**22,525**	**22,533**	**22,429**	**22,421**

12. Current and non-current assets and liabilities

Asset and liability line items presented below are based on the Group's intention and perceived ability to recover or settle these amounts within or after one year as at 30 September 2026:

EUR '000	Within one year	After one year	Total as at 30 September 2026
ASSETS:			
Cash and cash equivalents	312,020	-	312,020
Derivative financial assets	131	-	131
Loans to customers	505,986	429,779	935,765
Debt investments	56,261	39,142	95,403
Other financial assets	45,602	5,261	50,863
Current tax assets	1,353	-	1,353
Prepaid expenses and other assets	5,458	-	5,458
Intangible assets	-	42,742	42,742
Right-of-use assets	-	2,790	2,790
Property and equipment	-	2,760	2,760
Investments in associates	-	27,442	27,442
Deferred tax assets	-	2,952	2,952
Goodwill	-	7,491	7,491
Total	**926,811**	**560,359**	**1,487,170**
LIABILITIES:			
Derivative financial liabilities	941	-	941
Deposits from customers	909,301	192,365	1,101,666
Current tax liabilities	3,105	-	3,105
Debt securities	976	111,828	112,804
Lease liabilities	2,146	715	2,861

Right-of-use assets	-	3,923	3,923
Property and equipment	-	2,748	2,748
Investments in associates	-	29,198	29,198
Deferred tax assets	-	4,468	4,468
Total	**875,577**	**510,009**	**1,385,586**
LIABILITIES:			
Derivative financial liabilities	470	-	470
Deposits from customers	875,746	158,713	1,034,459
Current tax liabilities	2,443	-	2,443
Debt securities	195	108,158	108,353
Lease liabilities	1,994	2,108	4,102
Other financial liabilities	15,867	5,952	21,819
Other liabilities	5,972	-	5,972
Total	**902,687**	**274,931**	**1,177,618**

13. Information on credit quality of loans to customers

Expected credit losses (ECL) for Consumer and SME portfolios are measured on a collective basis in accordance with IFRS 9, using probability of default (PD), exposure at default (EAD) and loss given default (LGD). These parameters are derived from internal models and historical data, adjusted for forward-looking information, and the resulting ECL is discounted using the effective interest rate.

12-month ECL is based on 12-month PD, while lifetime ECL reflects the remaining contractual life of the exposure. PD represents the likelihood of default over the relevant horizon. For micro loans, PD is estimated using roll-rate methodology, while for instalment and revolving facilities, a curve-stitching approach is applied. Models are developed at country level and incorporate macroeconomic forecasts.

EAD reflects the expected outstanding balance at default, including principal, interest and fees, and incorporates expected future drawdowns for revolving facilities. LGD represents the expected loss in the event of default, considering recoveries, collateral (if any), and the time value of money. For unsecured portfolios, LGD is based on historical recovery rates and includes the impact of debt collection strategies and loan sales.

ECL is measured from initial recognition over the maximum contractual exposure period. For revolving facilities without fixed terms, a behavioural lifetime of 24 months is applied. For corporate loans of Wholesale Banking and secured SME Banking loans, ECL is determined individually based on internal credit ratings, contractual exposures and collateral recoverability, in line with regulatory requirements and industry practice.

The tables below show the Group's gross outstanding loans to customers' balances, risk grading, and basis for ECL recognition and measurement, including the movements and balances of loss allowances for loans to customers for the periods presented:

Gross outstanding loans to customers risk grading and basis for ECL recognition

Risk grade	Category	Basis for ECL	Days past due*		UTP	30 September 2026	31 December 2025
			Lower range	Upper range			
Regular	Performing	Stage 1 (12-month ECL)	0 to 30		-	864,659	759,243
Watch	Underperforming	Stage 2 (lifetime ECL)	31 - 45	31 - 60	-	18,960	23,239
Substandard	Underperforming	Stage 2 (lifetime ECL)	46 - 60	61 - 90	-	14,585	10,665
Doubtful	Non-performing	Stage 3 (lifetime ECL)	61 - 180	91 - 180	Yes	32,966	27,441
Loss	Non-performing	Stage 3 (lifetime ECL)	More than 180 days		-	125,785	133,099
Total gross carrying amount						**1,056,955**	**953,687**
Loss allowance						**(121,190)**	**(121,643)**
Carrying amount – net of loss allowance						**935,765**	**832,044**

* Lower and upper ranges of days past due are based on DPD thresholds of 60 and 90 days, respectively, to be considered as non-performing.

Reconciliation of 12-month and lifetime ECL provision

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- Transfers between 'Stage 1' and 'Stages 2 or 3' due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent 'step up' (or 'step down') between 12-month and Lifetime ECL;

- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments derecognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models;
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis;
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements;
- Financial assets derecognised during the period and write-offs of allowances related to assets that were written off during the period.

At and for the period ended 30 September 2026:

EUR '000				30 September 2026
	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	Total
GROSS LOANS TO CUSTOMERS				
As at 1 January 2026	**759,243**	**33,904**	**160,540**	**953,687**
Total changes in gross carrying amounts arising from transfers in between stages, new financial assets originated during the period and financial assets repaid during the period	110,030	(44)	47,071	157,057
Financial assets written off and sold during the period	-	-	(46,237)	(46,237)

Impairment loss on loans to customers				**79,458**

Macroeconomic variables

The calculation of ECL incorporates forward-looking information. In 2025, the Group enhanced its forward-looking information framework by refining the way macroeconomic information is incorporated into credit risk and ECL modelling. The objective was to improve stability, transparency, and consistency across countries and products, while remaining fully aligned with IFRS 9 requirements. The revised framework forecasts portfolio-level average default rates ("ADRs"), defined as the ratio of defaulted exposure to total exposure. Given the inherent volatility observed in monthly default rates, particularly within lower-volume portfolios, the Group applies a Hodrick–Prescott filter to extract the underlying trend component of default behaviour, reducing short-term volatility while preserving economically meaningful movements in credit risk. Forecast targets are logit-transformed. The modelling framework incorporates both external macroeconomic indicators and internally forecasted portfolio characteristics.

Country-specific portfolio-level variables, including the number of defaulting customers and the ratio of defaulting customers to total customers, are forecasted using Seasonal ARIMA (SARIMA) models. Forecasts are generated over a 15-month horizon, and the model is recalibrated monthly using updated portfolio data and refreshed macroeconomic projections. Macroeconomic inputs are sourced from Oxford Economics and include both historical observations and forward-looking projections. A broad set of macroeconomic indicators is transformed (including lag structures, first and second differences, and percentage changes) and subjected to correlation and multicollinearity screening. Final variable selection is performed using time-based cross-validation techniques to support robustness and out-of-sample stability. Following comparative assessment of multiple modelling techniques, the Group selected an exponentially time-weighted ridge regression model. The time-weighting mechanism ensures that more recent observations receive greater relevance, reflecting evolving credit conditions.

In line with IFRS 9, ECL estimates incorporate multiple forward-looking economic scenarios: baseline, adverse, and optimistic. Each scenario has assigned its own probability of weighting to reflect both its likelihood and potential impact on credit risk. The baseline scenario carries the highest weight as it reflects consensus forecasts and provides stability. The adverse scenario ensures that downside risks are appropriately reflected, while the optimistic scenario prevents systematic over-provisioning. Together, this approach ensures a balanced and prudent assessment of future credit losses. While the Group generally applies a 60% / 20% / 20% weighting across baseline, adverse (downside) and optimistic (upside) scenarios but weightings may differ by country or business unit to reflect differences in portfolio composition and sensitivity to economic conditions. The baseline scenario is always assigned at least 50%, and individual downside or upside scenarios cannot exceed 25%. Scenario weights always sum to 100%. The risk management function monitors the economic forecast releases on an ongoing basis and adjusts its model inputs and assesses the connected outcomes in the light of revised macroeconomic data and other quantitative and qualitative information on a quarterly basis.

The macroeconomic variables presented pertain to a specific territory where the particular product is available. The pertinent macroeconomic variables relating to the Group's lending portfolio as at 30 September 2026, utilised in the multiple regression, are sourced from Oxford Economics and are listed below.

14. Information on credit quality of debt investments

Debt investments in bonds

The outcome of periodical assessments in relation to the respective portfolio, coupled with the several clauses contained within the agreement, reflects the need for the Group to account for expected credit loss provision.

The tables below summarise the gross carrying amount and loss allowance balances for debt investments in bonds as at 30 September 2026 and 31 December 2025:

30 September 2026, EUR '000	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	Total
Debt investments in bonds				
Gross carrying amount	49,462	-	33,870	83,332
Loss allowance	(26)	-	(2,369)	(2,395)
Carrying amount – net of loss allowance	**49,436**	**-**	**31,501**	**80,937**

31 December 2025, EUR '000	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	Total
Debt investments in bonds				
Gross carrying amount	57,362	8,906	28,954	95,222
Loss allowance	(16)	(30)	(1,094)	(1,140)
Carrying amount – net of loss allowance	**57,346**	**8,876**	**27,860**	**94,082**

The consolidated statement of profit or loss for 9M 2026 includes an impairment loss of EUR 1.2 million (full year 2025: EUR 0.7 million) for debt investments in bonds, presented as part of the impairment loss on loans to customers line item.

Debt investments in securitisation portfolio

Such investments are principally secured by loan portfolios that are pledged in favour of the Group, taking into consideration pre-established collateralised ratios in relation to the amount invested and also encompass pre-established ratios of exposures by ageing of the underlying pledged portfolio. The Group conducts periodical assessments in relation to the respective portfolio, in order to determine the level of expected credit losses to be recognised. The outcome of such assessments considers the safeguards in favour of Multitude which are included within the investment covenants.

The tables below summarise the gross carrying amount and loss allowance balances for debt investments in securitisation portfolio as at 30 September 2026 and as at 31 December 2025:

30 September 2026, EUR '000	Stage 1 12-month ECL
Debt investments in securitisation portfolio	
Gross carrying amount	14,508
Loss allowance	(42)
Carrying amount – net of loss allowance	**14,466**

31 December 2025, EUR '000	Stage 1 12-month ECL
Debt investments in securitisation portfolio	
Gross carrying amount	13,314
Loss allowance	(328)
Carrying amount – net of loss allowance	**12,986**

The Group recognised an impairment gain upon ECL reversal on debt investments in securitisation portfolio in 9M 2026 amounting to EUR 0.2 million (full year 2025: loss of EUR 0.3 million), which are presented within the impairment loss on loans to customers line item in the consolidated statement of profit or loss.

15. Financial assets and liabilities classification and fair value

Financial assets

The table below summarises the Group's financial assets presented based on their classification, subsequent measurement (at amortised cost or FVPL) and fair value measurement hierarchy (level 1, 2 or 3) as at 30 September 2026 and as at 31 December 2025:

EUR '000	Fair value measurement hierarchy	30 September 2026		31 December 2025	
		Carrying amount	Fair value	Carrying amount	Fair value
FINANCIAL ASSETS AT FVPL					
Other financial assets:					
- Contingent consideration	Level 3	2,729	2,729	9,894	9,894
Derivative financial assets	Level 2	131	131	637	637
FINANCIAL ASSETS AT AMORTISED COST					
Loans to customers	Level 3	935,765	935,765	832,044	832,044
Cash and cash equivalents	Level 1	312,020	312,020	304,177	304,177
Debt investments:					
- Debt investments in bonds	Level 3	80,937	84,350	94,082	94,414
- Debt investments in securitisation portfolio	Level 3	14,466	13,496	12,986	15,626
Other financial assets:					
- Other receivables	Level 3	21,702	21,702	10,992	10,992
- Receivables from sold portfolios	Level 3	18,678	18,678	23,827	23,827
- Loans to related parties	Level 3	3,548	3,548	11,679	11,679
- Collateral receivables from banks and financial institutions	Level 3	4,206	4,206	4,206	4,206
Total		**1,394,182**	**1,396,625**	**1,304,524**	**1,307,496**

Included within cash and cash equivalents is a reserve balance of EUR 15.0 million maintained in accordance with the terms of the 2026 perpetual notes (ISIN: NO0013726893). The funds are available on demand and may be withdrawn at any time without penalty. However, non-compliance with the reserve requirement would result in an increase in the applicable interest rate on the perpetual notes.

As part of the consideration for the disposal of several subsidiaries in 2025, the Group is entitled to contingent consideration linked to the future profitability of the sold entities. The fair value of this contingent consideration is measured using the level 3 fair value measurement hierarchy, applying a discounted cash flow model at each reporting date based on expected cash flows and the risk-adjusted discount rates.

The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements and how a reasonable change in the input would affect the fair value of the contingent consideration:

	Unobservable inputs	
	30 September 2026	31 December 2025
Discount rate, %	14.07%	13.00%
Expected cash inflows (in EUR '000)	2,769	10,548

Change in discount rate	30 September 2026 EUR'000	31 December 2025 EUR'000
(+) 100 basis points	(2)	(42)
(-) 100 basis points	2	42

Change in expected cash flows	30 September 2026 EUR'000	31 December 2025 EUR'000
(+) 10 %	274	993
(-) 10 %	(274)	(993)

At the time of the sale, the fair value of the consideration was determined to be EUR 11.6 million. It has been recognised as a financial asset at fair value through profit or loss. As at 30 September 2026, after taking into account the payments received from the buyer during 9M 2026 amounting to EUR 11.1 million (full year 2025: EUR 3.9 million) and net fair value gain in 9M 2026 amounting to EUR 3.9 million (full year 2025: EUR 2.2 million), the asset's fair value was reassessed at EUR 2.7 million (31 December 2025: EUR 9.9 million).

The fair value of derivative financial assets is determined using level 2 fair value measurement hierarchy. The derivative assets include foreign currency forward contracts where the Group agrees to sell a predetermined amount of its foreign currency at a predetermined price.

The fair value of cash and cash equivalents is classified as level 1 fair value hierarchy because it has a fixed nominal value and is measured using quoted prices in active markets without adjustments, including observable spot exchange rates for foreign currency holdings.

Debt investments include debt investments in bonds and debt investments in securitisation portfolio. The fair values of debt investments were determined by discounting expected cash flows using current lending rates. These are classified as level 3 in the fair value measurement hierarchy due to the inclusion of unobservable inputs including counterparty credit risk.

Other financial assets classified as financial assets at amortised cost mainly include loans to related parties, collateral receivables from banks and financial institutions, receivables from sold portfolios

and receivables from non-lending activities. Collateral receivables from banks include mandatory deposits held with other banks as collateral for hedging. Receivables from sold portfolios include financial instruments that were originated and immediately sold, as well as delinquent loans sold via debt sale agreements. As at 31 December 2025, loans to related parties comprised a corporate loan issued to an associate and loans to members of the Leadership Team. As at 30 September 2026, loans to related parties comprised only of loans to members of the Leadership Team, as the associate became a wholly owned subsidiary during the current reporting period (Note 3.3). Consequently, the related loan was eliminated on consolidation.

The fair values of the remaining financial assets measured at amortised cost are classified as level 3 of the fair value measurement hierarchy, due to the use of significantly unobservable inputs. The Group estimates that the carrying amounts of these financial assets reasonably approximate their fair values as at 30 September 2026 and 31 December 2025.

Financial liabilities

The table below summarises the Group's financial liabilities presented based on their classification, subsequent measurement (at amortised cost or FVPL) and fair value measurement hierarchy (level 1, 2 or 3) as at 30 September 2026 and as at 31 December 2025:

EUR '000	Fair value measurement hierarchy	30 September 2026		31 December 2025	
		Carrying amount	Fair value	Carrying amount	Fair value
FINANCIAL LIABILITIES AT FVPL					
Derivative financial liabilities	Level 2	941	941	470	470
FINANCIAL LIABILITIES AT AMORTISED COST					
Deposits from customers	Level 3	1,101,666	1,101,666	1,034,459	1,034,459
Debt securities	Level 1	112,804	117,984	108,353	110,278

Lease liabilities		2,861	-	4,102	-
Total		**1,241,269**	**1,243,588**	**1,169,203**	**1,167,026**

The fair value of derivative financial liabilities is determined using level 2 fair value measurement hierarchy. Derivative financial liabilities include foreign currency forward contracts where the Group agrees to sell a predetermined amount of its foreign currency at a predetermined price.

The fair value of debt securities, which comprise only listed bonds, is determined based on published quotations from the Frankfurt Stock Exchange Open Market and the Malta Stock Exchange. These fair values are classified within level 1 of the fair value measurement hierarchy.

The fair value of the remaining financial liabilities measured at amortised cost is classified as level 3 of the fair value measurement hierarchy due to the use of significantly unobservable inputs. The Group estimates that the carrying amounts of these financial liabilities reasonably approximate their fair values as at 30 September 2026 and 31 December 2025.

2022 Multitude Bank p.l.c. tranche 1 unsecured subordinated bonds

The Multitude Bank p.l.c. tranche 1 bonds (ISIN: MT0000911215) were issued on 27 April 2022 with a coupon rate of 6.00%, maturing in April 2032. Of the EUR 5.1 million in bonds outstanding as at the reporting date, EUR 2.0 million were held by Multitude AG and were eliminated at the group level as part of the consolidation process. As at 30 September 2026, the tranche 1 bonds are presented as debt securities in the Group's consolidated statement of financial position and have outstanding nominal and carrying amounts of EUR 3.1 million (31 December 2025: EUR 3.1 million) and EUR 2.9 million (31 December 2025: EUR 3.0 million), respectively.

2024 Multitude Capital Oyj senior unsecured bonds

The Multitude Capital Oyj senior unsecured bonds (ISIN: NO0013259747) were issued on 27 June 2024 with a coupon rate of 3-month Euribor plus 6.75%, maturing in June 2028. As at 30 September 2026, the senior unsecured bonds are presented as debt securities in the Group's consolidated statement of financial position, have outstanding nominal and carrying amounts of EUR 86.6 million (31 December 2025: EUR 83.6 million) and EUR 84.9 million (31 December 2025: EUR 81.3 million), respectively.

2025 Multitude Bank p.l.c. floating rate callable Tier 2 Notes

On 10 March 2025, Multitude Bank p.l.c. issued EUR 25.0 million aggregate principal amount of Floating Rate Callable Tier 2 Notes due 2035 (ISIN: DE000A4D58U2) with a coupon rate of 3-month Euribor plus 11.00%, maturing in March 2035. The discount and issue costs, totalling EUR 0.9 million, are included in the proceeds from debt securities line item of the consolidated statement of cash flows for 9M 2025. As at 30 September 2026, these outstanding notes are recognised as debt securities in the Group's consolidated statement of financial position, have a nominal amount of EUR 25.0 million (31 December 2025: EUR 25.0 million), and a carrying amount of EUR 24.9 million (31 December 2025: EUR 24.1 million).

16. Perpetual bonds

2026 Multitude Capital Oyj perpetual notes

In March 2026, Multitude AG, through its wholly owned subsidiary Multitude Capital Oyj, successfully issued EUR 70.0 million subordinated perpetual floating rate callable capital notes ("2026 perpetual notes") with a framework amount of up to EUR 120.0 million. The 2026 perpetual notes (ISIN: NO0013726893) were issued at 96.00% of their nominal amount and bear interest at a floating rate of 3-month Euribor plus 8.90%. The discount and issue costs, totalling EUR 4.3 million, are included in the proceeds from perpetual bonds line item of the consolidated statement of cash flows. The 2026 perpetual notes are listed on the Frankfurt Stock Exchange Open Market and on Nasdaq Stockholm.

In connection with this issuance, holders of existing instruments (ISIN: NO0011037327) were offered the option either to exchange their holdings for the 2026 perpetual notes or to settle them in cash under a tender offer, in each case at a price of 102.00%. Overall, existing 2021 perpetual notes with a nominal amount of EUR 8.1 million were repurchased (comprising EUR 3.3 million under the tender offer and EUR 4.8 million through additional repurchases), and EUR 19.3 million were exchanged into the new 2026 perpetual notes. All transactions were executed at a price of 102.00%. Proceeds from the 2026 perpetual notes were settled on 23 March 2026, and the tender offer was settled on 26 March 2026. Following these transactions, the outstanding nominal amount of the existing 2021 perpetual notes amounted to EUR 17.6 million.

The net proceeds from the issuance were used for the refinancing of the 2021 Multitude AG perpetual notes, with the remaining proceeds available for general corporate purposes. Fitch Ratings assigned the notes a final long-term rating of 'B-' and a Recovery Rating of 'RR6'.

2021 Multitude AG perpetual notes

On 5 July 2026, Multitude AG completed the full redemption of its outstanding subordinated perpetual floating rate callable capital notes (ISIN: NO0011037327) with an aggregate nominal amount of EUR 17.6 million. The notes were redeemed at nominal value, together with accrued but unpaid interest up to, but excluding, the redemption date, amounting to EUR 17.8 million.

Settlement was effected on 6 July 2026 to noteholders of record as at 2 July 2026. Following redemption, the notes were delisted from Nasdaq Stockholm and the Open Market of the Frankfurt Stock Exchange.

17. Dividends

The Board of Multitude AG proposed, and the AGM approved a gross dividend of EUR 0.55 per share in the total amount of EUR 11.8 million for the financial year 2025. As of 27 April 2026, the shares traded ex-dividend and the record date was 28 April 2026. The payment, after deduction of applicable withholding tax, was made on 4 May 2026.

In the comparative period, the Board proposed, and the AGM approved a dividend of EUR 0.44 per share for 2024, comprising EUR 0.24 per share in line with the target payout ratio and an additional extraordinary dividend of EUR 0.20 per share. The total distribution of EUR 9.4 million, relating to the financial year ended 31 December 2024, was paid in May 2025.

18. Events after the reporting period

Placement of Additional Tier 1 capital bonds

On 6 November 2026, Multitude Bank p.l.c., a wholly owned subsidiary of Multitude AG, successfully completed the bookbuilding for its inaugural issuance of EUR 50.0 million of floating-rate perpetual Additional Tier 1 capital bonds (ISIN: NO0013771782). The bonds will be issued at 100.00% of their nominal amount and will bear a floating-rate coupon equal to 3-month Euribor, subject to a zero floor, plus 9.00% per annum. Interest is scheduled to be payable quarterly, subject to the terms and conditions of the bonds.

The bonds may be redeemed at the Bank's option, subject to regulatory approval, on the first call date five years after the issue date and on specified dates thereafter. Settlement is expected on or about 13 November 2026. The net proceeds are intended to strengthen the Bank's capital base and support general corporate purposes.

Leadership changes

On 11 November 2026, Multitude AG announced a leadership change in CapitalBox, its SME Banking business unit. Jesse Kaislavuo, previously Head of Process Transformation and Automation at Multitude Group, succeeds Mantvydas Štareika as Tribe CEO of CapitalBox and joins the Group Leadership Team. Mantvydas Štareika will assume the role of Commercial Director, Real estate, in the Wholesale Banking business unit, and will step down from the Group Leadership Team. The changes are effective 12 November 2026.
